changed to be present and he placed the man in his auto and took him to the hospital for treatment.

Are Terror-Stricken.

Like all of the men who ca the death hole they were of fe appearance. They resembled ne more than white men. They ha hats, their faces were black as from the smoke and cinders and hair was matted. They staggere they walked and it appeared moment as though they would fa the ground. All were injured, to

Have Terrified Look.

The other men remained in pool till about 4 o'clock Sunday m ing when they left for Wallace. fore their arrival a rescue party been sent from Wallace and they the men coming down. The terr looks on their countenances pl showed the night of dread and they had passed through. They a most pathetic sight as they staggered along and a number of them m bled incoherently. Most of them sustained burns or cuts, the latte jury occurring in their falls and former while they were in the which was surrounded by the They were taken to doctors' o and their wounds dressed, when were given food and then a bed rest.

Praise Pulaski.

All unite in saying that Mr. Pulaski proved himself a hero and that he is deserving of some honor from the government. He was in charge of this crew on the Big creek fire. The great gale that sprung up Saturday afternoon in a few moments lashed the embers into flying brands and before the fire fighters could realize it the blaze was over the lines and was burning in all directions.

Ordered Into Tunnel.

Pulaski saw that to remain there meant certain death for all of his crew so he quickly marshaled them together and said they would start for Wallace. As they proceeded the fires became worse and seeing that they could not proceed much further the forestry official told his men they must seek safety in the tunnel.

Gun Is Drawn.

All but one of the 40 men were willing to enter. The other said that he was going on to Wallace notwithstanding the commands of the man in charge. Pulaski then drew the revolver and forced him to enter with the others. It would have meant certain death for the man to have continued on alone at that time.

Gives Out Order.

When the men were got together

MULLAN SPENDS AWFUL NIGHT

MEN FORCED TO STAY IN TOWN AT REVOLVER POINTS.

MULLAN, Aug. 22.—Mullan spent

police officers and specials kept the men in town who attempted to get away. A special train carried out a number of wounded and injured fire fighters from Boulder creek. Men who tried to get out on this train were told that they would not be permitted to go and when they persisted they were treated in a manner that showed them they had better remain. A few carcasses with huge clubs the officers carried was the most convincing argument. Many though, got away by walking down the road.

The women and children were in great fear and a terrifying night was spent by them. They expected every minute that the whole town would go and it was only after many hours of the hardest kind of labor that the town was saved.

Dedication of When the Mountains Roared:

This commemorative reprint of When The Mountains Roared is dedicated to all who perished during the fires of 1910 and to the communities scarred by these tragic fires. It is important to remember these stories and understand how these events reshaped communities and influenced the young U.S. Forest Service. A hundred years later, we must continue to work together to restore healthy forests while learning to live with fire on the land in honoring the heritage of the great fires that run deep through the nation's history.

This Historical recount has been republished twice, once in the 1960's and the second one in the 1980's. And now in 2010, one hundred years later. No corrections were made to this document.

HISTORY OF THE 1910 FOREST FIRES – IDAHO & WESTERN MONTANA

BY ELERS KOCH

INTRODUCTION

If history is not written it is soon forgotten. The 1910 forest fire in the Northern Rocky Mountain Region is an episode which had much to do with shaping the fire policy not only of that region but the whole United States. The tragic and disastrous culmination of that battle to save the forests shocked the nation into a realization of the necessity of a better system of fire control.

It is not thirty-two years since that memorable summer. The men who took part in the campaign are getting older each year and before many more years have elapsed the 1910 fire season will be only a tradition. For this reason the writer who, as Supervisor of the Lolo Forest, had some small part in the campaign and the background of a current knowledge of the regional situation through those trying days, has undertake to compile an informal record of the fire history of that year. This is not written for publication, but primarily as a record for the Forest Service, so that the story will not be lost.

A large mass of historical material was assembled under the direction of Mr. Fred Morrell in the 1926, and free used has made of these records.

The Organization of the National Forests (1910)

By 1910 the organization of the National Forests in Region One was pretty well shaken down under the direction of the Forest Service, following the transfer from the Department of the Interior in 1905.

The first Forest Reserves in the Region date back to February 22, 1897. These included the old Lewis and Clark, which took in most of what is now the Flathead and the western section of the present Lewis & Clark and Glacier National Park. The old Bitterroot Reserve, created February 22, 1897, included most of the country from the Lolo Trail south to the Salmon River and a strip in Montana on the west side of the Bitterroot. The Priest River part of the Kaniksu was set up in 1898. The next oldest Forests in the Region are the Elkhorn, now the Helena, the Absaroka, the Little Belt, now in the Lewis & Clark, the Kootenai, and the Madison, which were withdrawn from 1900 to 1902. Most of the other Forests in the Region were established 1905 to 1906, including the Lolo, Cabinet, Pend Oreille, Coeur d' Alene and St. Joe.

Some sort of primitive fire control had been established under the General Land Office on the old Lewis & Clark, Bitterroot and Priest River Forest Reserves. The country was partly explored and a few trails built, but not a great deal had been accomplished up to the general reorganization of the older units, and a new organization of the new Forests by the Forest Service in 1905 to 1907.

In 1908 the present regional organization was set up with W.B. Greeley as District Forester and F.A. Silcox as Assistant. By 1910 the organization had pretty well settled down to approximately its present form. At that time, George N. Ring was Supervisor of the Nezperce; Major F.A. Fenn had the Clearwater, which then and what was subsequently the Selway Forest. W.G. Weigle was Supervisor of the Coeur d' Alene, which included most of the present St. Joe. W.N. Miller had the Kaniksu, and

J.E. Barton the Pend Oreille. In Western Montana the Supervisors were as follows:

Kootenai	Dorr Skeels
Blackfeet	F.N. Haines
Flathead	Page S. Bunker
Cabinet Ralph	H. Bushnell
Lolo	Elers Koch
Bitterroot	W.W. White
Missoula	D.G. Kinney

The five or six years previous to 1910 had all been fairly favorable fire years, so that the organization on many of the Forests had relatively little experience in large-scale fire-fighting. An exception to this were the Lolo and Coeur d' Alene Forests. The year 1908 was a fairly dry year, and the C.M. & St. P. Railway was just finishing construction through these forests, and in the course of right-a-way clearing operations scattered fire pretty well all along the line, so that these forests went through a rather intensive training period and the personnel learned to handle large crews on fires. The effect of this training was very apparent in 1910.

THE GREAT FIRE

Set an airplane course from Clark Fork, Idaho, south 25 degrees east, approximately along the axis of the Bitterroot Range, and fly on this course 160 miles to Moose Creek on the Selway River. On 70 percent of this flight you would be flying over 1910 burn, with the burned area extending an average of 25 miles on either side of the line. Even then you would have seen only three-quarters of the burned area, through the South Fork and the North Fork of the Flathead, and westerly across the Kootenai and Kaniksu Forests to see the rest of the fire-swept area. Three million acres of green forest burned, most of it in the two terrifying days.

The snowfall in the winter of 1909 did not appear to be deficient. A cruising party on the upper St. Regis River from April 3 to the first of may found four to six feet of snow packed so hard that snowshoeing was rarely necessary. It is probable that the snowfall in the mountains was normal or above normal. But the summer drought started early all over the Region. Form the first of April on, the usual spring rains were almost lacking. The hills hardly got green that spring. July followed with intense heat, and drying southwest winds from the Columbia plains. Crops burned up all over the Region. As an indication of the drought conditions, press dispatches on July 10 stated that the Northern Pacific Railway was laying off 3,000 to 4,000 men on account of crop failure along the line. The Forest became tinder-dry, ready to explode at the touch of a spark.

Already in June fires began to break out in all the Forests. Several times through July severe electric storms swept the mountains, starting new fires. The newly organized forest-protection force was thinly scattered. There were no lookouts, and detection of new fires depended on intermittent patrols. In the vast wildernesses of the St. Joe, Clearwater, Salmon and Flathead Rivers, were only a few primitive trails along the natural routes formed by the main divides and ridges. The great river canyons of the St. Joe and Clearwater were still almost inaccessible.

In the face of all these difficulties, the little force of rangers and guards struggled desperately and in many cases effectively with the constantly recurring fires. By July 15 over 3,000 men were employed as fire-fighters. Men were shipped from Missoula, Spokane and Butte until the supply of floating labor was exhausted.

There was no reserve of fire equipment in the Region at that time. As new crews were put out, new equipment was purchased from the hardware stores. Axes, mattocks, shovels, cross-cut saws, wash boilers, tubs, coffee pots, and frying pans were bought as needed until the supply in most of the local stores was exhausted. The standard bed for a firefighter that year was only a shoddy blanket or one cheap soogan.

A 50-man crew was a big one. There was no thought of putting 500 or 600 men on a fire as is frequently done today. Firefighting methods used were not fundamentally different from present practice and a great deal of efficient work was done. By August 15 over 3,000 small fires and over 90 large ones had been controlled. In the more accessible areas such as the Lolo and much of the Coeur d'Alene Forest, a real and successful attempt was made to send crews promptly to all fires. In the back-country districts of the Clearwater, Selway and Flathead Rivers, there is no doubt that many fires burned for weeks without being attacked, and in many cases five or ten men were fighting which would require a hundred to do effective work.

On August 8, President Taft authorized the use of the regular Army for firefighting. About eight or ten companies were assigned to Region One, on the Coeur d'Alene, Lolo and Flathead Forests. Since most of them got in place just about the time of the big blow-up, their accomplishment was not important, though they were of some value for police purposes during the general disorganization after the big fire.

The firefighting job progressed with varying degrees of success degrees of success through July.

Severe electric storms swept the mountains in the latter part of July and many new fires were started. By the end of the first week in August things began to look better. On the 9th, the Supervisor of the Lolo, whose forest had been particularly hard hit, made the statement to the press that every fire on his Forest was out, or practically under control. Regional Forester Greeley asserted on that date that the general situation was greatly improved.

The 10th of August was a bad day, with low humidity and high winds. Fires picked up everywhere and there was a wave of fire which crossed the Bitterroot Range from Idaho into Montana in many places all the way from Stevens Peak to the Lolo Pass.

The effect of this blow-up, which greatly extended the fire lines and scattered fire widely, had much influence on the holocaust yet to come.

Firefighting efforts were redoubled and more crews put out, and by August 19 things again looked better. Many miles of fire line were held, and with the end of the season approaching, it looked as though the loss might not be too great.

Then came the fateful 20th of August. For two days the wind blew a gale from the southwest. All along the line, from north of the Canadian boundary south to the salmon, the gale blew. Little fires picked up into big ones. Fire lines which had been held for days melted away under the fierce blast. The sky turned a ghastly yellow, and at four o'clock it was black dark ahead of the advancing flames, One observer said the air felt electric, as though the whole world was ready to go up on spontaneous combustion. The heat of the fire and the great masses of flaming gas created great whirlwinds which mowed down swaths of trees in advance of the flames, in those terrible days many fires swept thirty to fifty miles across mountain ranges and rivers.

The town of Wallace lay directly in the path of the fire, and by the evening of the 20th a third of the town lay in ashes. The flames from the Coeur d'Alene fires swept on to Taft, Saltese, DeBorgia, Haugan, crossed the high range to the Clark Fork, jumped the Clark Fork, and swept on across still another range to the head of the Fisher river, destroying towns, homesteads, lumber camps, everything in their path.

Special trains, crowded with refugees, bore thousands of people to safety into Missoula and Spokane. Had it not been for fine work on the part of train crews, the loss of life would have been far greater.

The unfortunate firefighters on the Coeur d'Alene Forest were caught in the uprush of the fires from the St. Joe River across the summit of the Bitterroot Range. Too late to escape to safety, they were forced to weather the blast in such places as promised some degree of safety. Some retreated into mine tunnels, some took refuge on recently burned-over areas, some lay in some small streams with their heads covered with blankets.

When the terrible toll of losses was finally added up, 72 firefighters were dead on the Coeur d'Alene Forest, four on the Cabinet, and two on the Pend Oreille. Two lives were lost in the burning of Wallace and one at Taft. A peg-leg prospector was burned near the St. Joe-Cedar Creek Divide, and three homesteaders burned to death near Newport. Altogether, 85 lives were lost in the two-day conflagration. Many of the surviving firefighters were terribly burned, and as the pitiful remnants of the crews straggled out of the mountains, the hospitals of Wallace were filled with injured men.

The fires swept fiercely on all day the 20th and 21st, but about 1:00 a.m. on the 22nd and 23rd, and the night of the 23rd a general light rain, with snow on some of the higher ranges, temporarily checked the flames.

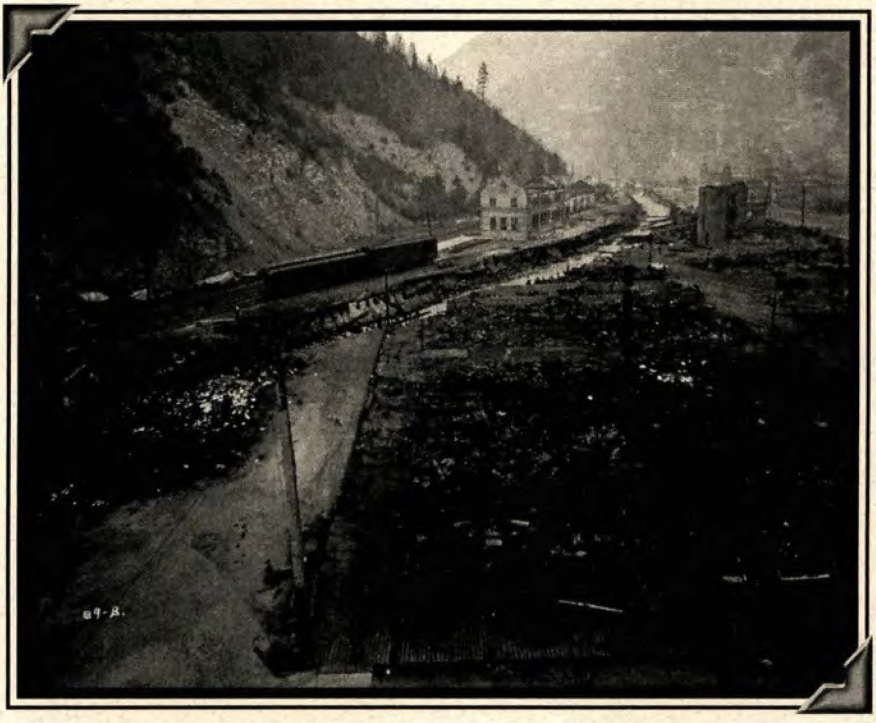
The following week burning conditions again picked up, and the widespread fires made some advance. Most of the fire crews had been driven out of the hills. Camps and equipment had burned, and crews had been largely paid off. But under the spur of District Forester Greeley crews were again organized on a large scale, and set about cutting off the spread of fires and opening up trails through the burned country. A good general rain beginning the night of August 31 ended the fire season.

THE COEUR D' ALENE & ST. JOE

In 1910, the territory now in the Coeur d'Alene and St. Joe Forests was under direction of Supervisor W.G.Weigle, with headquarters at Wallace. Owing to proximity to settlements and the large number of fire crews out at the time of the big blow-up, the Coeur d'Alene suffered more in loss of life and property than any other Forest.

Through May, June, and the first half of July, numerous fires were started from lightning, campers, and from the two railroads which

traversed the Forest. Most of these were put under control. Outside the Forest, the Pine Creek fire to the west, burned all through the latter part of July and was a continue threat. On July 23, a severe electric storm passed over, and set numerous fires. These were manned as rapidly as possible but, with new fires starting daily and continued high winds which threw brands to a great distance, conditions got steadily worse. On August 13, even though the nearest fire was six miles from Wallace, numerous pieces of burning bark as large as a man's hand fell in the streets, setting awnings on fire in three different cases. By this time there were eighteen hundred men fighting fire on the Coeur d'Alene, besides two companies of soldiers.



After the fire of August 20, 1910.
(The Oregon-Washington Railroad and Navigation Depot) Wallace, Idaho.

WALLACE BURNS

With Pine Creek ten or twelve miles of the city, afire all through the latter part of July and the first of August, and with numerous fires to the south, just across the St. Joe divide, the people of Wallace were badly worried. On August 14, a newspaper reporter stated that all insurance men had all their clerks busy writing fire insurance policies, but were not refusing any business. On August 20, a high wind arose about noon. All existing fires flared up, and new ones were started. Great thunderheads showed to the south and west, as the fires rushed to uncontrollable proportions. It was obvious that a holocaust was impending.

Since the greatest danger to Wallace was from fire coming down Placer Creek, Supervisor Weigle took a saddle horse and started up the creek to reconnoiter. He was caught in the rush of the fire, and had to abandon the horse and take refuge in a mine tunnel. He did not succeed in getting back to Wallace until 10:30 that night, with his eyebrows and clothes scorched from his close encounter with the flames.

With the adjacent hillsides all ablaze, the fire broke into town at 9:15 Saturday night. The whole eastern part of the city burned, and before the flames were under control by the fire department, approximately one hundred building were burned, with an estimated loss of one million dollars. Two lives were lost in the fire.

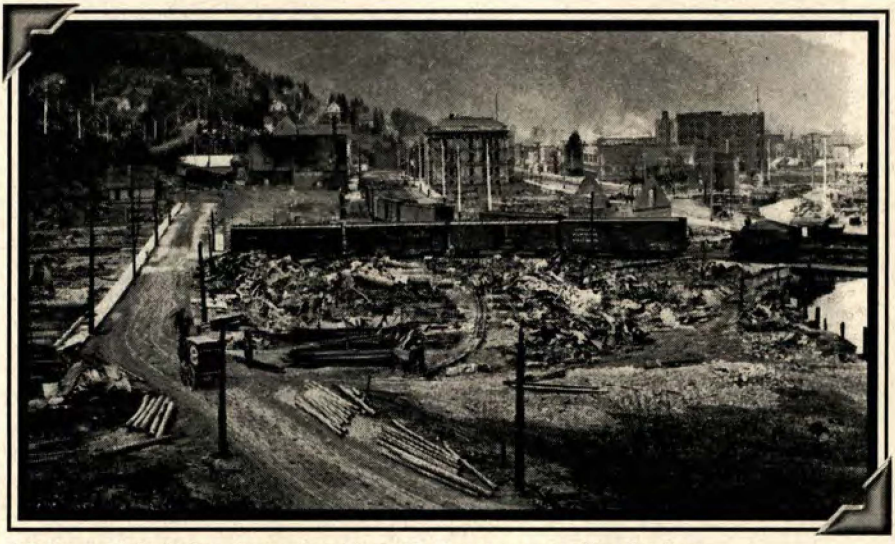
A relief train on the Northern Pacific started from Wallace about 10:00 p.m. loaded with women and children. They picked up many more refugees at Mullan and Saltese, and arrived in Missoula Sunday morning.

All day Sunday new reports of terrible loss of life came in, as the scorched and burned survivors of various firefighting crews stumbled wearily into town, with tales of terror and disaster.

The terrific uprush of fire from the St. Joe drainage across the divide caught every firefighting crew in that territory, and they were doomed

unless they could find a safe place to weather the blast of flame. The story of each of the seven Coeur d'Alene crews caught in the fire is taken from Supervisor Weigle's report of June 24, 1911.

Wallace, Idaho- Taken after the fires of August 20.

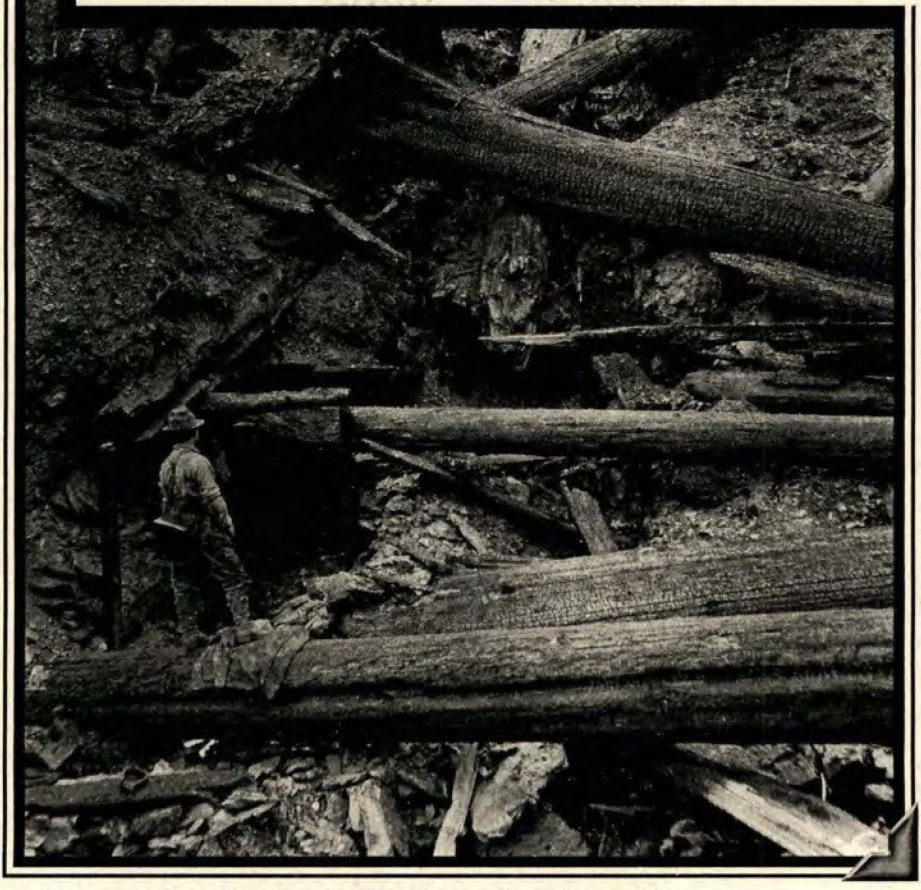


Wallace, Idaho-Taken September 12, 1910- Damage caused by the fires.

STORIES OF FIREFIGHTING CREWS

Pulaski's Crew – Placer Creek

Mr. Pulaski, who is about forty years of age, is a man of most excellent judgment, conservative, thoroughly acquainted with the Region, having prospected throughout the burned area during the last 25 years, and is considered by the old timers in the region as one of the best and safest men that could have been placed in charge of a crew of men in the hills. Mr. Pulaski



Mine tunnel where Pulaski and crew held up until the fire passed.

was in charge of about 150 men distributed over a divide between Big Creek and the Coeur d'Alene River and Big Creek of the St. Joe River. When the danger conditions became imminent he rounded up about 40 of his men who were in the danger zone and cut off from safety on the west side of the fire where the other men were located and started with them down the mountain toward Wallace, a distance of ten miles. When he got about half way, however, he found that he was cut off by new fires. At the sight of this, his men became panic stricken, but he assured them that he would still get them to a place of safety. Being thoroughly familiar with the region he knew of two prospect tunnels nearby, the shorter being about 50 feet in length and the longer about one hundred feet in length. Not being certain as to whether or not he could reach the largest and safest, by putting a wet gunny sack over his head, he penetrated the dense smoke to where he could see the largest tunnel, and finding it was safe he rushed back to his men and hurried them to the tunnel, getting them there just in time to get them inside before the fire reached them. The portion of his crew with him consisted of 42 men and two horses. He got all of his men and horse inside the tunnel, with exception of one man who had fallen a few hundred feet behind and was caught by the fire before he could reach the tunnel."

"The intense heat caused by the forest fire outside of the tunnel caused the cold air of the tunnel to rush out and the smoke and hot air to rush in. The timbers supporting the tunnel caught fire and Pulaski stood as near to the mouth of the tunnel as he could, and from a little stream that flowed from the bottom of the tunnel dipped water with his hat to dash upon the burning timbers, until he was badly burned and fell unconscious. Prior to becoming unconscious himself, he had commanded all his men to lie on their faces for protection. All of the men were evidently unconscious for a portion of the time. One of the men, however, having sustained less injury than the others, recovered to the extent that he was able to crawl out of the tunnel, and the fires by this time had subsided sufficiently for him to drag himself into Wallace and notify the Forest Office. This was about 3:00 in the

morning. A crew was immediately sent to the tunnel and all of the men and horses were removed. Although nearly all of the 42 men were still in a helpless condition after being taken to the hospital in Wallace, they rapidly recovered their strength, with the exception of five who had smothered before they were reached. The two horses, although still living, were in such bad condition that they were immediately shot. The man who failed to get into the tunnel was burned beyond recognition. Had not Pulaski known the location of this tunnel, every one of the 42 men in his crew would have perished."

Bell's Crew – Middle Fork Big Creek

Mr. John W. Bell is a man of about 35 years of age, thoroughly acquainted with mountain conditions, having spent a large part of his life in this western country. He is a conservative and thoughtful and an all-around man of the mountains. He had his crew, consisting of about 50 men, working in conjunction with Pulaski's crew at the head of the middle fork of Big Creek. When the terrific windstorm arose and fires were started in new places, he sought safety on a small clearing on the homestead claim of Joseph Beauchamp. Under ordinary conditions this place, consisting of a clearing of about two acres, would have been sufficient to offer protection. A small stream flowed through the opening and some of the men protected themselves by lying down in the stream, while seven sought shelter in a small cave that had been dug for the purpose of storing the belongings of Mr. Beauchamp. The terrific storm that preceded the fire by about a minute, which was of course intensified practically every tree of a dense forest in this region. The seven men who sought shelter in the cave were burned beyond recognition three others who were in the stream were killed by falling trees. This constituted the number of dead of this crew, but the remainder who sought shelter in the creek had their hair burned off the back part of their heads and the skin all burned from their necks, besides being nearly suffocated from the smoke. One of these injured men made his way into Wallace, a distance of twelve miles, by nine o'clock Sunday morning, the day after they were injured.

Judging from the distress of the men in Pulaski's crew, I had already put a crew of 17 men to work cutting out a trail leading to this point, and upon learning the condition of the men, I immediately sent out two doctors on foot, with a crew of men with medicine, blankets and provision, to help the injured men. It required a crew of 17 working all day Sunday, Sunday night, Monday and Monday night to open the trail to the injured men 12 miles from Wallace. This enabled me to get pack horses in to the injured men and they were brought to Wallace. With the exception of two men who had friends at this place, the dead men were buried near the spot where they died, a few days later. Reverend Carter, a Congregational minister at Wallace, volunteered to go along with the burial crew to give Christian burial to the dead. All of this crew, with the exception of the ten men who were killed, speedily recovered from their injuries at the hospital at Wallace. The Beauchamp cabin was located in the Middle Fork of Big Creek in Section 27, Township 47 North, Range 3 East."

Rock's Crew – Setzer Creek

Mr. William H. Rock is a man about 25 years of age, having served for two years in the region in which he was fighting fire; therefore he was thoroughly acquainted with the details of the region where his men were working. He had a crew of approximately 70 men about six miles northeast of Avery, Idaho. When the terrific windstorm arose and the fires started up in many places he found he was cut off from getting his men out to Avery. Therefore he led them to an area that had burned over the day before. This proved to be a place of absolute safety and all the men came out uninjured. As evening drew on the fires were burning up so terrifically that huge columns of smoke which contained large quantities of combustible materials would frequently burst into flames that would shoot into the sky for thousands of feet. This, some of the men told me later, frightened Oscar Weigert to the extent of his wanting to kill himself. He left the crew, however, without anyone knowing it as the time, and even though two shots were heard, no on knew that he had taken his life until the following morning. Mr.

Rock had his crew in perfect safety, and the unfortunate happening to Mr. Weigert was a matter entirely beyond the control of Mr. Rock who was in charge. The location of Weigert's death was somewhere on the ridge on the east of Setzer Creek."

Debbitt's Crew – Setzer Creek

Mr. Debbitt is about 35 years of age. He was in charge of the district during the last four years, having headquarters within six miles of where the men perished; therefore was thoroughly acquainted with all the conditions which might have led to the protection of the men. Owing to the fact that he had general charge of the district, he was away from the men when they perished, but a few hours preceding this, seeing that danger was imminent, he sent Charles Sullivan, who was then servings as Deputy Sheriff at Avery, into where about 70 men were working on Setzer Creek, telling them to come out to Avery immediately as there was danger of being hemmed in by the fire. All of these men came out with the exception of 28 were burned beyond recognition a few hours afterward. These men were all wrapped in blankets and sewed in heavy canvas and buried where they were burned. The bodies of the men were found at the extreme head of Storm Creek; the next drainage west of Setzer Creek in Section 29, township 29 North, Range 5 East."

Hollingshead's Crew – West Fork Big Creek

Mr. Hollingshead is about 22 years of age. Although a young man, he has always exercised good judgment.

He is conservative and had served as Forest Guard in the immediate region in which he had charge of men for two years; therefore was thoroughly familiar with the country. He had charge of a crew on the west fork of Big Creek fighting a fire that was coming northeast from Trout Creek. He had a crew of about 60 men. When the terrific winds scattered the fires all over the region and they discovered that they were surrounded by fire, all of his men with the exception of 19 worked through the fire line to a place of safety on an area that had previously

burned over. Nineteen of these men, being thoroughly panic stricken rushed down the hill ahead of the fire to a little cabin where five pack horses were stationed. They found that the fire was all around them. They went into the cabin and remained there until the roof began falling in. They rushed out of this and tried to break through the fire line, but the fire was so terrific that 18 out of the 19 perished in the flames within a few feet of the cabin. The nineteenth man accidentally worked his way through the fire line and came out to the St. Joe two days later with all the skin off his face and hands and his clothing practically burned from his body. After six weeks in the hospital this man fully recovered. Mr. Hollingshead the next day went into the place where these men perished and found eighteen men, five horses and a large black bear that had perished in the flames all at the same place. The men were wrapped in blankets and canvas and were buried where they perished. They were all burned beyond recognition. The cabin where these men perished was known as the Henry Dittman cabin, and located on a tributary of Big Creek, known as Deadman Gulch near the south line of Section 35, Township 47 North, Range 2 East."

Danielson's Crew – Stevens Peak

James Danielson is a young man about twenty-two years old. Although young he was thoroughly acquainted with woods work and had been over the Region many times where his crew was located. He had eighteen men in his crew. When he found he was surrounded by fire he took his men to an open park near the timber line which contained a light covering of bear grass. They burned off a large area in this park, thinking that by so doing they would have absolute protection of the very best kind. When the terrific fires approached this area, however, instead of stopping when the burned area was reached, as would be expected, they continued to burn over the same area the second time. The men in Danielson's charge had their blankets with them which served as their only protection. They held these blankets over their heads until the flames had practically consumed them. One of the men, however, by accident, inhaled the flames and perished on the spot. The other men were very badly burned about the face and hands. The

fire reached these men about nine o'clock Saturday evening. Early Sunday morning Mr. Danielson, although badly injured, worked his way into Mullan, a distance of five miles, and delivered the news. Pack horses were immediately sent to the place and the men, although badly injured were brought to Mullan and given medical attention at Dr. Key's office before they were brought to Wallace at 2:00 p.m. by special train which I received through the kindness of the Northern Pacific Railway Company. These men were all placed in the Wallace hospital, where they remained from one to six weeks, all recovered with the exception of three who have stiff hands."

Taylor's Crew – Bullion Mine

S.M. Taylor is a man of about forty years of age and a conservative, intelligent fellow thoroughly able to handle men, and a prospector in this region for many years. He had charge of the Bullion fire along the Montana-Idaho line east of Wallace. When Mr. Taylor discovered that he was surrounded by fires he took his crew, consisting of about sixty men, to the tunnel of the Bullion mine, which seemed to Mr. Taylor to offer absolute protection. One of the men, Mr. Ryson, who was with the crew, knew the tunnel thoroughly, owing to the fact that he had made it. Most of the crew who went into the tunnel passed an overhead air shaft. Eight of the men, however, did not do this and the smoke rushed in to where these eight men were located and suffocated them. The remaining crew came out a few hours afterward without any injury; neither had they experienced any inconvenience during the time they were in the tunnel. Mr. Taylor immediately notified me of the conditions and although this was within about four miles of the Northern Pacific Railway, several large trestles along the mountain had burned out; therefore I could not depend wholly upon the railroad to bring these dead men to Wallace, so I sent a crew of men the next day to bury the dead bodies. About ten days later, when the railroad was sufficiently repaired on both sides of the mountain to make it more convenient for handling these bodies, I sent a crew of men to the place with pack horses to disinter the bodies and bring them to the railroad, where through the kindness of the Northern Pacific Railway Company,

a special car brought them across the mountain to Dorsey. At this point a trestle was still not replaced and the dead bodies were transferred to another special train sent out from Wallace. The bodies were delivered at the morgue at Wallace and prepared for burial and a few days later they were given Christian burial in the Wallace cemetery."

Joe Halm's Crew – St. Joe River

For nearly a week after the great fire, it was believed that Ranger Joe Halm had perished with his crew of sixteen men. Halm and gone back into the St. Joe Wilderness, 65 miles across the Bitterroot range to fight the Bean Creek fire. On the 20th when the great wind swept the country, the crew was surrounded by fire and forced to take refuge on a sand bar in the St. Joe River near the mouth of Bean Creek. Here they weathered the fire, which swept the entire upper St. Joe drainage. The story of the party has been well told in an article by Halm in the July 1930 issue of 'American Forests and Forest Life.'

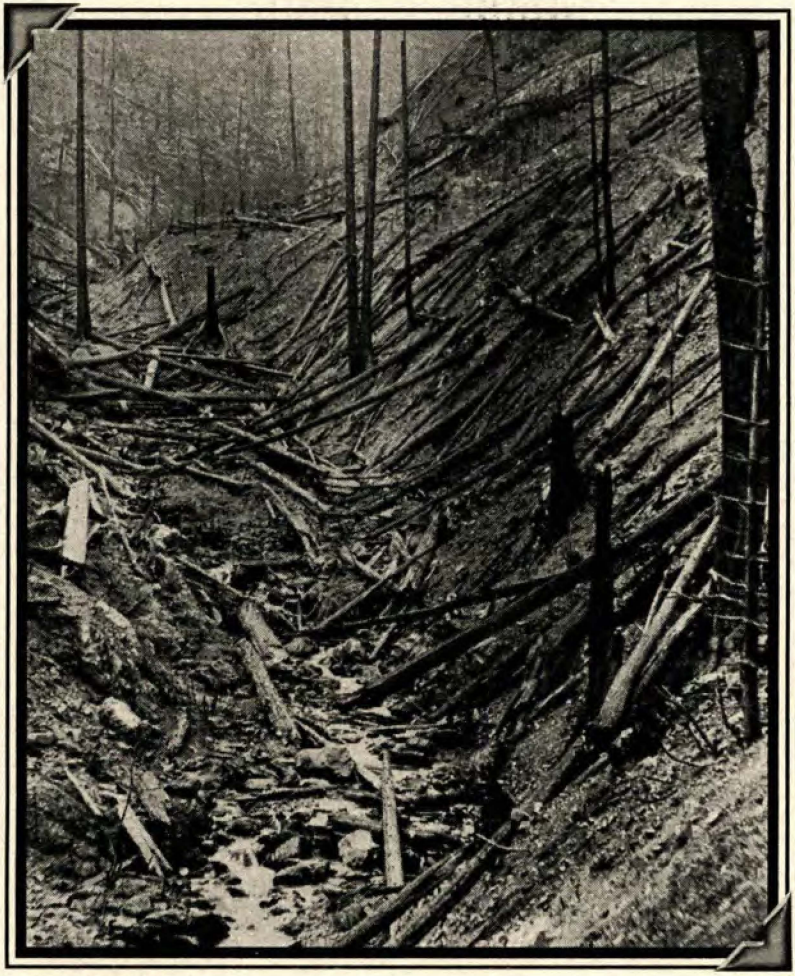
"Their two packers fled across the range just ahead of the flames, taking only one horse with them. The entire pack train had to be abandoned and all of the horses burned.

"It was not till a week later that Deputy Supervisor Roscoe Haines, coming to the rescue of the party from Iron Mountain, located the crew and brought word of their safety."

THE MILWAUKEE RAILROAD

At the time of the great fire, the C.M. & St. P. Railroad had just been opened through the St. Joe territory. While trains were running, the many high timber bridges had not yet been filled, and there was much construction work still underway. The whole twenty-five miles of railroad through the rugged country between Avery and the Taft Tunnel was swept by a consuming blast of fire so hot that pick handles lying in the open beside the track were utterly consumed. Considering the number of people in this section and the severity of the fire, it is almost miraculous that no lives were lost along the railroad. Great credit is due

C. H. Marshall, superintendent, and W. R. Lanning, chief carpenter, of the Missoula division. Under direction of these men the town of Avery was evacuated by special train. Between Avery and the Taft Tunnel there were probably 1,000 people, mainly railway workers and their wives and children. These were picked up by work trains at the last moment, with bridges blazing, and at imminent danger to the trainmen's lives. Trains were run into tunnels and held there while the fire swept by, consuming everything up to the tunnel portals. Sixteen bridges, from 120 to 775 feet in length, were burned in this section.



Placer Creek.

INDVIDUAL EXPERIENCE...

Considering the number of people, miners, homesteaders, etc., scattered through the mountains, it is remarkable that there was not greater loss of life. Several parties had very narrow escapes. While Wallace was burning, Mrs. "Speedy" Swift, with her baby, was hemmed in by the fire at the Hord Ranch on Placer Creek, four miles from Wallace, together with a dozen firefighters. They battled the fire all through the night with wet gunny sacks over their heads. The house was saved, but all other buildings burned, and it was not until t he next morning that her husband, who was in Wallace, learned of his wife's survival.

The Pattison party, consisting of Mr. and Mrs. E. H. Pattison of Wallace and five other men, had an extremely narrow escape. They were working on a mine on Sherlock Creek near the head of the St. Joe River when the conflagration of the 20th struck them. When the tornado of fire and wind swept around them, they were able by great good fortune to get through a line of the fire to a freshly burned area where they weathered the storm. Scorched and half-blinded by the smoke, they made their way the next day thirty miles down Cedar Creek to Iron Mountain, Montana. One member of the party, Con Roberts, a prospector with a wooden leg, got separated from the party in the smoke and flame. His body was found about a week later, half consumed.

Mr. and Mrs. George Cook, Mullan, Idaho, were working at the Silver Cable mine near the head of the St. Regis River. When the uprush of the fire struck them on the 20th, they were forced to flee across a high divide and down Prospect Creek 30 miles to Thompson Falls. Miraculously, they made it, through fire and smoke. Fortunately the fire lagged somewhat on the creek bottom, and though it swept clear ahead of them on both sides of Prospect Creek, by walking all night and the next day, the exhausted couple reached safety.

Several parties of miners, caught in the conflagration, managed to survive by retreating to mine tunnels.

BURYING THE DEAD & PAYMENT OF CLAIMS

Owing to the great difficulties of transportation, most of the dead firefighters' bodies were buried where they lay. A great many of them were burn beyond all hope of identification. The eight dead men at the Bullion mine were temporarily buried in a long trench, but a week or ten days later were disinterred and the bodies moved to the Wallace cemetery.

Coeur d' Alene Hardware Warehouse ruins after the August 20 fire. (Wallace, Idaho).

Store ruins (Wallace, Idaho).

Most of the other bodies lay in the temporary graves until 1912, when fifty-three corpses were exhumed under contract with a local undertaker, at a cost of $60.15 each, and reburied in cemetery at St. Maries. In 1924 the appropriation bill carried an item of $500 for marking the graves, and a suitable monument and headstones were erected.

The treatment of the injured men immediately after the fire presented many difficulties. Some of the survivors were terribly burned, and most of them suffering from eye or lung damage from the smoke. The records show that 101 men were given hospital treatment on the Coeur d' Alene Forest.

Fiscal difficulties and lack of legal authorization and appropriations created great difficulty in caring for the injured men. A fund of $1,700 was raised by contributions from the Forest Service personnel, and $1,000 was contributed by the Red Cross, which met most immediate needs.

The present Employee's Compensation Act did not exist at the time, but Congress finally passed a general deficiency items cover cost of hospitalization and compensation to injured men and the families of men who were killed. Since, with the exception of a few local men most of the firefighters were transients unknown even to each other, and some of the time books were burned, the task of final settlement with the men, and identification and location of their families, was an enormous one, involving in several cases the location of relatives in European countries, and a vast amount of correspondence.

LOLO FOREST

The Lolo Forest fought one long battle against fire from the latter part of June to the end of August. The organization had not only its own territory to protect, but was threatened by a continuous series of fires coming up from the Idaho side of the Bitterroot range from the wilderness country of the St. Joe and Clearwater, all the way from Stevens Peak to Lolo Pass. Most of the loss suffered in the Lolo was from the sweep of fire from Idaho on August 20 and 21.

Throughout July and the first part of August there was a series of fires, believed to be incendiary, extending from Frenchtown up the Nine Mile Valley. Ranger D. B. McGregor put up a fine fight on these fires, but as soon as one fire was beaten, another would be started, mostly in the slashings of the Western Lumber Company.

Five or six large fires ere handled in succession, but one by one they were beaten, and when the big wind of August 20 arrived, the lines all held, and the Nine Mile Valley was saved.

In the meantime, the Lolo Rangers were carrying the fight over into Idaho. Ranger T.C. Spaulding took a big crew across Lolo Pass to the Lochsa country. Kenneth Robinson had a crew at the head of Fish Creek. Ranger H. P. Barringer of Lolo and Ranger J. S. Garrison of the Clearwater fought a long battle on fires coming up opposite the head of Trout Creek. Ranger F. Haun at Saltese, with fine assistance from Ranger R. A. Phillips and ranger J. E. Breen, did a splendid job of organization against the many fires threatening the upper St. Regis country. It is almost miraculous that, with the many fires crews strung along the summit of the Bitterroot Range, when the big fire hit them, not a man or a horse was lost from the Lolo fire crew.

When the fire swept across the St. Regis drainage on August 20 and 21, the towns of Taft, Haugan and DeBorgia were completely destroyed. Saltese was saved, except for on or two buildings, by a fine battle led by Ranger Haun and the Northern Pacific Railway crew. Haun tells of one man burned to death here. The man had been badly burned at Taft, and Haun and Breen had brought him down to Saltese, where he was put in a freight car, his burns dressed with oil and cotton. One of the man's friends, having done his best to salvage whiskey supplies in Saltese before they burned, looked in to see how the man was doing and lit a match for illumination. The unfortunate man's cotton dressings were ignited and he rushed forth screaming, and burned to death.

HUNDREDS FLEE FOR LIVES

Immense Area in Coeur d Flames—Fire Spreadin Property Doome

WOMAN AND BABE IN WOODS AFIRE

WITH DOZEN MEN SPEND NIGHT IN ACRE CLEARING.

One of the most awful experiences Saturday night was that of a crew of a dozen fire fighters at the Hord ranch, four miles from Wallace, on Placer creek. The men were wholly surrounded by fire and had only a space of an acre that was not burning. To add to the terrors they had a woman and her baby with them, Mrs. "Speedy" Swift.

When the men with the woman and child attempted to get into Wallace they found that the fire had swept down in front of them and there was no chance of reaching the city.

The men all gathered in the small vacant spot near the creek where they fought for their lives and that of the woman and child the whole night long.

At times the fire became so hot that the clothing of the men caught fire. To prevent themselves from smothering they would place gunny sacks that had been soaked in water over their heads. The house at the Hord place was not destroyed, but all of the adjoining buildings went.

Early yesterday morning the men came down the creek and reached here in safety with the woman and child.

"Speedy" Swift, the husband, was in Wallace when the fire broke out and was unable to reach them. He was in a frightful state here during the night, believing that both his wife and baby had been burned.

Women Refugees Walk Over Mountain

Mrs. Henry Henderling and Miss Lillian Dube.

With their feet sore and bleeding, after walking 28 miles across the mountains from Burke, Idaho, to Thompson, two women arrived in Spokane at 10 o'clock Tuesday night, after spending two nights and a day in the mountains almost surrounded by forest fires. They were Mrs. Henry Henderling of Mace, Idaho, with her two children, aged 2 and 3 years, and Miss Lillian Dube, aged 20. Others in the party were Miss Emma Dube, aged 18 years; Philip Dube, aged 23 years, and Arthur Dube, aged 19 years. Both the boys and the women had the skin rubbed from their feet and toes in places. All were provided with rooms in the Majestic hotel over night.

Mrs. Henderling was practically without funds, and being unable to get money at the Postal Telegraph office which was wired her, because there was no one to identify her, the woman was obliged to borrow enough to see her through last night and to buy supper and breakfast for herself and children from R. H. Hughes, chairman of the relief committee, until she can get her money from the telegraph office. Mrs. Henderling and Miss Lillian Dube told their story thus:

"Mr. Henderling was working in the mines, and when we heard the town was sure to burn we immediately gathered up a little food, took what clothes we are wearing and with the children started on the tramp across the mountains Saturday at 11 p. m. The boys did not know the way, but a swe were leaving Burke we ran across another party in which was a man who knew the mountains well, and he acted as a guide. We got well up on the mountains and stayed for the night, and spent all day Sunday walking at intervals and spent Sunday night in a cabin near the Arlington Prospector mine, which burned shortly after we left Monday morning. We arrived at Montana Standard at 12 o'clock Monday and were met there by rigs which another party which had outdistanced us, owing to the children having to be carried, had sent back for us from Thompson. We arrived in Thompson at 5 o'clock Monday and Mayor Hogian took us to his home, gave us supper and kept us until Tuesday afternoon, when we boarded a Northern Pacific train for Spokane. We were treated nicely everywhere."

LA GRANDE, Ore., Aug. 20.—This city is lighted tonight by a forest fire that broke out today in the hills west of town and has not as yet been subdued.

Local people are still in the hills fighting the fire that threatens the timber on Beaver creek. Near Medical Springs troops are combating the fires in the forests with but little headway. In Wallowa county new fires broke out tonight and it is likely the government troops will be called on for that region. According to old settlers, there is stopped from doing further damage.

Family Has Hairbreadth Escape

The Sparfeldt Family.

Mr. and Mrs. A. Sparfeldt and their baby daughter of 2024 Spofford avenue reached home Monday night from a camping trip to Avery, Idaho, after a hairbreadth escape from death in a forest fire which twice nearly engulfed them.

Their camp was on the St. Maries river, a few miles below Avery. Sunday afternoon Mr. Sparfeldt became alarmed at the threatening aspect of the forest fires on two sides and decided to walk to Avery. When that town was reached it was found to have been abandoned by its female population, while practically all the men were out fighting back the forest fires. Refuge was offered and accepted at a miner's cabin until the train came along the next day.

Meanwhile the fire fighters were compelled to resort to backfiring, and the gale of wind drove the fires thus started down on the Sparfeldt's new refuge, with the result that they had to run for their lives. Before they reached the railroad grade the flames were leaping waist high about them, and Mrs. Sparfeldt's skirt was almost entirely consumed. She fell in a faint on the railroad embankment and was only restored to consciousness, after being carried a considerable distance, by the plentiful application of water.

Flames on the Hills Are Creeping Near

Taken from the "Spokesman Review" (August 25, 1910).

Roy A. Phillips' Story

Forest Supervisor R. A. Phillips was at that time a ranger under F. D. Haun. He was handling speeder patrol along the railroad track between Saltese and Lookout and when fires commenced to break in all directions he was put in charge of one side of the Bullion Mine fire. His own story of the big fire is well worth quoting.

"On August 20, I had completed a fire line to the state line and my crew had been reduced to a patrol basis. Baird had a crew on the south side of the fire and was having some trouble holding his line. S. M. Taylor, foreman for the Bullion crew, and now county commissioner of Shoshone County, had all but about a mile or mile and a half of the west side of the fire trenched. I had been around the fire a day or two previously and it was apparently in good shape and not a great deal of line was being lost. The fire had, of course, been projected by this time and J. E. Breen, Ranger, stationed at Taft, was in charge."

"The day of August 20 differed very little from preceding days, there was little wind noticeable and there was no premonition of the calamity about to occur. My crew had a hard job holding a section of line under the fire on a precipitous slope and it took us until dark to get everything in good shape to leave for the night. Even in those days we had discovered the futility of leaving out night patrolmen except in extreme instances and I took all my crew into camp that night, which proved to be a very fortunate circumstance. As we had no lanterns or other means of light, I recollect that it was so dark that we could only follow the fire line with difficulty, one man getting lost in the brush and it was some job to get him back on the line."

"About nine-thirty, while were on our way into camp, we were startled by a burning brand apparently a couple of feet long that hurtled down out of the sky a hundred yards from the camp. I sent two men from the camp to locate this phenomenon and hastily got something to eat and went to bed, dog tired.

"At midnight, or shortly after, the night cook woke me up probably alarmed by the noise that the relief train from Wallace was making on its way east

– the engineer was blowing the whistle intermittently to warn people to be ready to leave. However, the train did not wait for us, although there were in the neighborhood of 150 men in camp. By this time the flames were beginning to show on the horizon and the roar of the fire was becoming audible. I speedily awakened several men I knew were dependable and went over to the point on the railroad where our supplies were unloaded, to take care of some provisions unloaded late the previous afternoon. We accomplished our object and were returning to the camp with four or five water barrels that the railroad company had sent out for use on bridges, when we met the entire crew badly demoralized, and apparently leaving the country. The fire by this time was an awe-inspiring spectacle, the whole horizon to the west was aflame and the noise was terrific. In addition, our fire was out of control and raging across the line below us to the southeast and our only avenue of escape effectually cut off."

"The entire fire crew lead by one of the foremen, had conceived the idea of getting into a railroad funnel at Borax as they thought it was the safest place to escape the fire. Knowing from experience gained traveling through this tunnel on patrol that there was always a strong air current through it, I succeeded in turning back all of the crew but the foreman and one other man and, finding that they were alone, they soon followed us back to the campground. On the way we met Lieut. Titus who had arrived in camp the previous afternoon with a detachment of regular soldiers for the purpose of patrolling the fire lines. He and his men were following up the fire fighters as they no intention of remaining in camp alone. The lieutenant was agreeable to the plan I suggested of remaining where we were, so we returned to camp and speedily constructed a fire line around it and immediately set a backfire which spread rapidly outward drawn by the suction of the main fire."

"By this time the roar of the oncoming fire was so great that it was only with difficulty that conversation could be carried on without a person standing at your side. The vanguard of the fire was sweeping over us and the hills all around us were catching fire and soon were

a raging mass of flames. Our backfire had burned out perhaps one or two hundred yards before the main front of the fire struck and when they came together the heated air current filled with cinders swirled down upon us and for a short space of time that seemed an eternity, we gasped and choked for air and were blinded by smoke. Finally the air cleared and found that nearly everything inside our fire line was burning that had not been wet down; fortunately the grounds was fairly clear of refuse and the buildings and tents had all been soaked with water and did not catch fire."

"Outside of a few men who were temporarily blinded by smoke, the crew was in fairly good shape. One man who thought he had gone blind was thwarted in an attempt to take his life. We were also fortunate in having a week's supply of provisions ahead. Everyone was so nearly exhausted and weak from the effects of the smoke to be much concerned about anything the first day, and although an attempt was made to get through to the other crew, the ground was still too hot to do so. However, a timekeeper with the Bullion crew managed to get through with the news that eight of the men in that crew had perished in the Bullion tunnel. I attempted to get through to Saltese with this message and met J. E. Breen coming up on a speeder so returned to camp while Breen went back to Saltese to report. The fire was still burning briskly along the railroad and the chance for suffocation was considerable as it was impossible to tell what one was running into as in places the flames were shooting across the rails and the smoke was blinding. However, I succeeded in getting back to camp and the following day Lieut. Titus, John Baird, and I went into the Bullion mine, identified the bodies there, wrapped them in blankets and interred them in a long shallow trench, side by side."

Several days later Baird and I disinterred three of the bodies, lashed them on horses and took them over to Potsville where we turned them over to a troop of soldiers to take into Wallace. These men were Larry Ryson, a Wallace miner, and two yound men, Leslie Zellers and Val Nicholson from Kellogg. The remaining bodies were disinterred a week or ten days later, when the railroad resumed operations.

"The story of the experience of the men in the Bullion tunnel is worth recounting. Their first knowledge of the fire came when a section of a limb of a tree as big as a man's forearm fell out of the air, striking a sleeping man on the leg, causing a serious bruise. On awakening, this man perceived the fire coming up Bullion Creek although it was only a short distance from the camp. One member of the crew carried his blankets into the tunnel and it was only through this circumstance that any of the crew was saved. These blankets were stretched across the face of a little drift running off the main tunnel and all but eight men went into this drift, several were suffering from the effects of smoke and bad air, but there were no casualties."

"The spectacle of this fire was awe-inspiring almost beyond belief and was sufficient to strike terror to the strongest heart; it seemed a hopeless task to attempt anything that would divert the path of so ruthless a monster; many grown men in the crew were absolutely helpless and there were several who could only weep or moan, believing they were doomed. The fact that we were situated on a small knoll fairly clear and sufficiently elevated to alleviate the danger of suffocation, and the fact that our backfire spread so rapidly accounts, I believe, for pulling through. The water in the stream below us became almost boiling hot and was, I judge, too hot to be borne had it been necessary to take the water. A dense stand of timber a short way from our camp was laid flat to the ground and in places large trees were lifted bodily out of the ground and deposited some little distance from where they originally stood."

"Our backfire was responsible for breaking the fury of the main front of the fire and a considerable area back of our camp and in line with the direction of the fire was merely spotted with fire. In this area at daybreak we discovered that there were eight or ten head of deer that showed no signs of fear on approach. They remained around camp until the ashes had cooled."

"On the next day following the fire, we took steps to save a railroad bridge and tunnel which were temporarily saved by our backfire but

which would undoubtedly have burned had we not put out the fires that still burned near them."

CABINET NATIONAL FOREST

The Cabinet Forest suffered a tremendous loss from fire in 1910, but the greater part of the damage was done in two days when the fires from the St. Joe and Clearwater swept across the Clark Fork valley, and beyond to the Kootenai Forest. There were at least three large fires which came across the divide. The great st. Joe fire, which burned Wallace and DeBorgia, crossed the range and threw a long spur south of Prospect Creek clear to the Clark Fork River. Two fires swept out of the North Fork of the Coeur d'Alene, one from Trail Creek and one from the extreme head of the river. Both these fires crossed the Clark Fork valley, destroying homesteads, towns and sawmills.

The railroad station at Tuscor was burned, and Ed Donland lost his mill at Trout Creek, with most of his equipment, including 25 head of horses, the pigs in the pen and 13 million feet of white pine lumber. Many ranches were burned.

Four firefighters lost their lives on Swamp Creek. The following story is quoted from the official report:

Tuscor Fire

H.S. Kaufman, Forest Ranger, in charge. Roy Engle of Noxon, Montana, was directly in charge of the party in which loss of life occurred.

"For several days before August 21, 1910, Roy Engle was working on Swamp Creek on what was known as the Swamp Creek division of the Tuscor fire. His crew was composed of about 25 men. On August 21 this crew was working up Swamp Creek about 10 to 12 miles from its mouth. Ranger Kaufman, who was in charge of the fire, was working with a crew along Clark Fork River at the mouth of Swamp Creek. In the

afternoon of August 10, a strong wind sprang up and scattered the fires in all directions. Realizing the dangerous position of Engle's crew, Ranger Kaufman set a messenger to Engle, directing him to come our at once with his crew. Engle got this word late at night August 20 and started out in the morning of August 21, following the trail down Swamp Creek. Getting down within four miles of the river, they met a fire coming up Swamp Creek. This was a fire which had come over the divide from Idaho the previous night and was, up to this time, entirely separate from the fire on which the crew was working. When Engle with his crew met this fire it was too large to pass through so Engle took his crew back up swamp Creek from whence he had come, expecting to cross over the burned area through the fire on which he had been working, but on reaching a point where he had expected to pass through the fire line, he found that the wind had fanned the fire into a raging furnace. Finding that they were cut off from the valley, Engle took his crew on farther up Swamp Creek hoping to reach a large body of slide rock located there. They were soon overtaken by the fire coming up the creek, and mad a stand on an open slide rock side hill, several of the party digging holes in the slide rock for further protection. The fire swept up the gulch and side hill, a top fire burning everything in its path and throwing embers among the men who were making their stand on the slide rock. Five of them became panic-stricken and left the crew, starting up the mountain our of the slide rock. Anderson was behind, and when the other four were caught by the fire he abandoned the attempt to escape and came back to the crew badly but not fatally burned. The other four men perished when the fire struck them. Several other members of the crew were more or less burned and all of them were nearly blind from smoke and heat."

"The men were burned some time near midnight on the night of August 21. At daylight on the morning of August 22, the remainder of the crew made its way to the river, where the men were cared for by Ranger Kaufman and his crew."

"The names of the men who lost their lives in this fire were George Strong, George Fease, E. Williams, and A.G. Bourette."

PEND OREILLE NATIONAL FOREST

The Pend Oreille escaped better than most of the Idaho Forests, though there were several large fires. The big fires from the upper North Fork of the Coeur d'Alene cut the extreme southeast corner of the forest, south and east of the town of Clark Fork. Two firefighters lost their lives in this fire. The following is quoted from the official report on the fire:

DeFaut Fire

William T. Brashear, Forest Guard, in charge.

"The party in which loss of life occurred was working under the direct charge of W. E. LaMonte, who had previously been in charge of a trail crew on this forest and who had been pressed into service on the fire line under the exigencies then existing. This fire burned largely in the DeFaut Gulch, which is a small dry gulch near Cabinet, Idaho, and south of the Clark Fork River (now called Dry Creek). It was originally supposed that this fire came over the divide from the Coeur d'Alene National Forest, but later investigations showed that it came around the head of Elk Creek from the Cabinet National Forest and joined with the smaller fire already burning in the DeFuat Gulch. The fire already in existence in DeFaut Gulch had been brought under control by LaMonte and his men. The party, consisting of 10 men, were camped about one mile from the fire line in a clearing of two or three acres. At noon on August 19 the men came back a short way from the trenches for lunch. LaMonte had returned to camp to hurry up the lunch, which was late. He had hardly got into camp before he became aware of the fire which was sweeping in from the south, driven by a fierce wind. Brashear, the Forest Guard, had learned of the approaching fire and hurried back to camp from a trip over the fire lines. He met LaMonte coming out and at once started to warn the men. When they reached the clearing it

was plain to Brashear that the fire would over-take them. There was a spring in about the middle of the clearing and Brashear ordered the men to wet their clothes and bedding thoroughly, put their bedding over their heads, lie down near the spring, and wait until the fire had passed. They had hardly done this when the fire swept on them. At this juncture two to them apparently lost their reason completely, jumped up, threw off their bedding, rushed into the fire, and burned to death only few yards from where the rest of the men lay.

"The fire had hardly passed over when a relief party was organized by Deputy Forest Supervisor E. G. Stahl and a search started for Brashear and his men. They were found on August 20 in the clearing in an unconscious condition, but were soon restored to consciousness. If the two men who perished had followed orders and stayed with the crew, they, too, would have been saved. As it was, some of the balance of the crew had their eyes and hands badly burned trying to restrain the two men who were killed."

"The men at the time the fire occurred were working under instructions to patrol the fire lines around the fire on DeFaut Gulch, which was then under control."

"The names of the two men who lost their lives in the fire were J. Plant and J. Harris."

KANIKSU NATIONAL FOREST

While there were fires all summer long on the Kaniksu, the area burned in 1910 was not excessive, and has been exceeded in subsequent years. The worst fires were outside the forest to the west. The most destructive fire came over the mountain from the direction of Deer Park, crossed the Pend Oreille River below Newport. Since this country was fairly well settled at the time, many homesteaders lost all they owned, and some of them barely escaped with their lives. Three homesteaders were caught by the flames and burned to death. These

were Mrs. Ernest Dinehart, George R. Campbell and William Ziegler. One group of settlers escaped by getting in a boat on Marshall Lake. The Dalkena Lumber Company mill at Dalkena was burned.

Beaver Creek on the Clearwater Forest.

CLEARWATER FOREST

The Clearwater Forest at that time included the present Clearwater and most of the Lochsa and Selway River drainages, with headquarters at Kooskia under Major F. A. Fenn. It was mostly virgin wilderness country, with few trails. Lightning fires were spotted all over the Forest, and the widely scattered rangers were doing the best they could with small crews of five to twenty men to a fire. Many fires were never reached at all.

When the big blow came August 20 and 21, the whole head of the Clearwater burned, from Weistas Creek up through Kelly Creek and across the Bitterroot Range 10 to 15 miles down on the Montana side.

On the Selway River, the fire ranged through Moose Creek and much of the Upper Selway River.

Moose Creek Crew

Since the upper Selway River is more accessible from the Montana side than from Idaho, the District Office in Missoula arranged for a firefighting crew to go in by the Lost Horse Trail from the Bitterroot to handle some of the fires on Moose Creek. Deputy Supervisor Ed Thenon took in one such crew. After a long journey they made camp on Moose Creek in a big cedar flat, eight miles above the Three Forks Ranger Station. At four o'clock it became pitch dark, but strangely enough Thenon did not seem to realize the cause of such untimely darkness. Thenon has written his own story, and it is such a vivid description of the experience of one crew in weathering the big fire it is quoted.

"There were 30 men at this camp. Soon after supper the men began to retire all but myself. Being one of those persons who used the bed extensively as a place where lots of time can be spent thinking over one's troubles, I bedded down at 10 o'clock but did not go to sleep. A short time there-after I heard something dropping on the tent and believing it to be rain drops I jumped up and went outside to see. I turned up my face but not feeling anything I spread out my hands but still could feel no rain. I re-entered the tent and lay down again and soon heard what I thought was a shower of rain. On going outside the tent again I discovered that there was a strong wind blowing through the tree tops and needles and refuse from the tree tops were dropping on the tent. I said: "Damn, why couldn't it just as well be rain," and went in and lay down again."

"Not long after this I heard someone outside my tent calling, 'Ed.' I recognized the voice as Louie Fitting's. I said: 'Hello, what's the matter?' He said: 'Come out here, I just saw a star fall on the hillside across the creek and it has started a fire.' I was outside at once and

sure enough he pointed out a small fire starting well up on the hill across the creek from our camp. I knew it was out of reason to think a star could have set this fire, and in looking around to the west, the direction the gale of the wind was coming from, I saw the sky aglow with pink color spread across a width of several miles. I knew at once all about Fitting's star and where it came from.

"The fire was coming at a high rate of speed. Already it was beginning to throw shadows in our camp and we were right in the middle of its path."

"I aroused the men at once and ran out a few steps to the creek to see what the chances were for us there. I found the creek to be six or eight inches deep and about eight feet across with a strip of sand six feet wide which had been strewn along its edge by a sharp turn in the creek. A drift pile eight feet high and twelve feet long was at the upper point of this strip of sand."

"I ran back to the men who were all up by this time upon seeing what was about to happen, some of them were beginning to cry and take on pretty bad, while others were as cool and calm as if this was an everyday occurrence, and these were the men who were to be so valuable to me that night and who followed out my every order throughout the night."

"I ordered the men to move everything out on the strip of sand and pile it up in one pile. Some of them were so excited they could do nothing and wanted to try to make their getaway ahead of the fire. I knew this was an impossible thing to do. I got up on a log and called all the men's attention to me long enough to advise them not to leave this spot, to stay together, and not to make an effort to save themselves by leaving the creek, that this could not be done. I said; 'If we all lie down in the creek during the crisis, no one will be hurt and we will pull through all right.'

"The cooler heads got busy moving our outfit to the sand strip while I was sizing up that drift pile trying to determine whether to set it on fire and try to burn it up before the crown fire reached us or leave it and try

to keep it from burning until the overhead fire had passed over us. I did not want this drift and the crown fire over our heads at the same time as it would make our position much worse. I got a water bucket and decided to keep the drift from burning until the overhead fire had passed on. The men were busy piling up our camp outfit not far from the drift pile. The fire was close by the drift had already caught fire several times and had been put out with buckets of water. At this time someone reported that all the camp had been moved and I ordered them to wet all the canvas and throw it over the grub pile. By this time pieces of burning bark and cinders were coming down all about us. I was very busy with my drift pile. It was catching fire in places faster than I could put it out. I stopped long enough to tell the men to take all the blankets and soak them in the creek."

"Charley and Fitting had the two horses covered, heads as well as their bodies with wet blankets. By this time the heat from the crown fire was plainly felt as it was only a few rods away and the wet canvas thrown over the grub pile had already caught fire."

"I was throwing a bucket of water on the grub pile when I heard a commotion among the men and left my work to see what it was about. We had rolled in the creek several times before this to keep our clothes soaked. I found that two of the men had completely lost their minds. One of them had become violently insane and three men were trying to hold him and to him down in the creek. The other one was dancing around and singing a lullaby."

"Right here was the time when those cool-headed men were of the inestimable value to me as several other men became frantic at this time and wanted to rush off to, I don't know where. I ordered every man to get into the creek, lie down and put a wet blanket over his head. I set the lullaby boy down in the deepest water and told him to stay there and threw a wet blanket over his head. He would not lie down. The three men with the other fellow (he was our cook) had gotten him to lie down in the creek which had quieted him some. The others who became wild were also taken care of by the cooler-headed men and were lying down

in the creek by this time. There were two or more blankets for each man so we were not short on these."

"I looked down the strip of sand and saw that all men except Charley and Fitting were in the creek. These two were dashing water on the blankets covering the horses."

"I turned to the grub and drift piles and found them both blazing. I grabbed up my bucket and dashed a bucket of water on the canvas and at this very moment the crown fire was directly over me and some sudden shift in the wind brought the heat right down upon me. The heat was so intense that it took my breath away. I swayed around a step or two with the empty bucket still in my hand and dropped to my knees. This was the critical moment, the crisis, and the only moment during this ordeal that I felt sure my time had come and that it was the end. On falling to my knees and for no particular reason I struck my head into the bucket. This proved a blessing as I was able to draw a breath instantly and was relieved of the terrible strain. I got to my feet and with two or three steps I was in the creek where I lay down with the bucket still over my head. Having no blanket wit me, I kept the bucket over my head for it had certainly saved my life."

"In perhaps five minutes the wind changed and this relieved us somewhat of the intense heat. The lullaby boy (I did not know his name) was still singing and now and then calling for someone to throw another bucket of water on him. I raised my bucket enough to look around some but saw no one moving except Charley who was throwing a bucket of water on the horses' blankets, then lying down again in the creek. Later he said that the blankets had dried out to such an extent in those few minutes as to catch fire from the cinders falling about us. The cook had quieted down considerably."

"The overhead fire had passed on and the heat was gradually moderating. Now we had the ground fire only to contend with, and soon we began getting out of the water to huddle around the heap of coals left by the burned drift pile to dry out our clothing. The snags

and blazing old dead trees across the creek gave us plenty of light to see. The grub pile and canvas were a heap of ashes. Three men and I were suffering great pain in our eyes. They were smarting and burning so badly that it was almost impossible for us to open them enough to find our way around."

"To make sure that everyone was there and safe I had the roll called and found two missing. We could not come to any conclusion but that they had tried to outrace the fire and lost their lives in the attempt. Some of the men who knew their names began calling out to them. Soon we heard an answer from down the creek and the two deserters came wading up the creek to us. I scolded them some for leaving camp, and asked them why they did it. One of them remarked that they could not see how anyone could survive in this place so they went down the creek to see if they could find a place they thought might be safer. They found a large old cedar tree across the creek with the stump part high enough from the water to enable them to crawl under and they stayed there. After the fire had passed on they were much surprised to hear someone calling as they thought they were the only ones who had come through the critical time alive."

"Now there was considerable danger from falling timber. There were several standing dead trees near us that were burning and one had already fallen almost into our camp as a warning. A little later John wanted to use a bucket and walked down the sand strip to where one was, and just as he bent over and reached for it, a tree struck it and smashed it flat. If the bucket had been a foot further away the tree would have killed John instantly."

"The horses remained very quiet during all this excitement. This may seem very strange, and it is, but the fact that they had wet blankets over their heads and could see nothing that was going on around them accounted for it."

"The cook's condition had improved so much that he had no further need of attention from us. However, he did not get back to a normal

state while here, but I was informed some weeks later that he had entirely recovered, the 'lullaby boy' was taken to an asylum."

"By this time it was getting daylight. Breakfast, and how to get it was now our problem. We sized up the ash heap under which were our supplies. One of the men got a chip and commenced to carefully scrape the ashes off the pile. The four of us whose eyes were affected were sitting down trying to nurse our eyes that were paining us so much. I had been snow-blind some years before and the pain in both cases seemed to me to be identical. One of the men said he knew of a remedy that would relieve our pain. He went over to the grub pile and commenced digging around and soon came back with a half a cup of table salt and told us to dash some into our eyes. We did this and I thought it was more ashes than salt for while, but it surely helped us and by using it often several times, our eyes improved nicely."

"The men now had the ashes pretty well scrapped off the grub pile. One had a pot and was filling it with half baked beans. One had a pan and was carefully dipping up flour, while another pulled out a slab of bacon, fried on one side only, and breakfast was soon on the way. One was still digging around in the heap for coffee and sugar but found none. All sacks and wrappers were burned off the stuff, making a sweet mess of it. One took a large coffee pot and filled it from the creek and put it on the fire with the remark that it would look like we were having coffee anyway. 'Yes,' another one said; 'it ought to be good and stout too, from the ashes in that water.' We had some kind of a breakfast.'

While this was going on, Ray Fitting now Supervisor of the St. Joe Forest, was scouting the fire situation in the North Fork of Moose Creek, alone. He was caught in the sweep of the fire and took refuge in the creek under an overhanging ledge. The fire swept over him, burning the timber to the water's edge, but by keeping under water with his coat over his head he managed to survive the terrifying experience. He said he was really scared when the dead fish began to drift down past him. If the water was hot enough to kill the fish, he had visions of being boiled alive."

KOOTENAI FOREST

The Kootenai suffered its heaviest loss on August 21, when the great fire from the Coeur d'Alene swept clear across the Clark Fork Valley, and over the divide, burning a very large area in the head of the Fisher River.

Another very large fire started on the Yaak River in the vicinity of Sylvanite and on the 20th and 21st swept far to the east in Pipe Creek and Big Creek. This fire did serious damage to mining developments near Sylvanite.

NEZPERCE FOREST

The Nezperce had several large fires through the season, though losses were not as heavy as farther north. On August 20 and 21st, the town of Elk City had a narrow escape, the whole surrounding country being swept by fire. Forest Ranger G.I Porter is credited with organizing the defense and saving the town.

DAMAGES.....

The reports available on the damage to forest and property are conflicting, incomplete and inaccurate.

The summary report from the National Forests of Region One shows the following:

Number of fires – 1,736, of which 233 were lightning
Area burned – 2,595,635 acres
National Forest timber destroyed – 5.408 Billion Board Feet
Value - $13,470,906
Total cost of firefighting to Government - $795,281

Outside the National Forests the figures are probably very incomplete and inaccurate, but show:

Area burned: 512,184 acres
Timber destroyed – 2.241 Billion Board Feet

It is probable that the area burned in Montana and Northern Idaho was over three million acres and that seven to eight billion feet of merchantable timber was destroyed. Reports on damage to property are very incomplete. About one-third the city of Wallace was burned, DeBorgia, Haugan and Tuscor, all small towns, were entirely burned. The Forest Service probably lost six or seven strings of pack stock; and a large number of horses, cattle, pigs and chickens belonging to homesteaders and lumber complainers were burned. The Forest Service lost at least four ranger stations. Damage to mine building and tunnels, particularly in the Coeur d'Alene Region, was great. The toll of human lives had probably been accurately determined as follows:

Firefighters:	
Coeur d'Alene (including St. Joe)	72
Cabinet	4
Pend Oreille	2
Civilians:	
Wallace	2
Taft	1
Prospector at head of St. Joe River	1
Homesteaders below Newport	3
Total	**85**

The greatest loss of valuable timber was on the St. Joe, particularly on Big Creek, Slate Creek and the Little North Fork. At the time of the fire the Milwaukee Lumber Company was constructing a railroad up Big Creek to log 100 million feet of white pine just purchased from the National Forest at $4 per M, besides a number of private claims. All of

this was burned – one of the finest bodies of white pine in Idaho – but was partly salvaged.

On the upper St. Regis River, 99 million feet had just been advertised and bid at $4.50 per M, but the contract not executed. Most this was burned, but later partly salvaged.

The Coeur d'Alene lost much fine timber on the Upper North Fork. The damage on the upper Clearwater never was accurately known, but many million feet of fine, but inaccessible white pine were burned.

SALVAGE OF TIMBER....

Before the ashes of the great fire were cool the Forest Service started action toward securing information for the salvage of as much timber as possible. It was recognized immediately that a very high percentage of the timber was so inaccessible that salvage was hopeless, but there were many bodies of good timber, particularly white pine, which offered possibilities.

Timber survey crews and appraisers were organized as rapidly as possible, particularly through 1911, and available chances were cruised, appraised and advertised as fast as they could be reached. The existing lumber companies in Idaho and Western Montana were anxious to do their part, and many of them transferred their operations entirely to fire-killed timber. The major salvage operations were as follows:

COEUR D'ALENE

The Rose Lake Lumber Company logged a large amount of white pine on the Upper North Fork from McPherson's up into Independence and Trail Creeks. The timber was driven down river. The Stack-Gibbs Lumber Company operated on lower Big Creek and adjacent river areas. There were also many smaller sales made along the North Fork.

ST. JOE

The Milwaukee Lumber Company had started a railroad into Big Creek before the fire. This railroad was extended and that company logged Big Creek until 1915. That company also logged timber in the Little North Fork, including Loop Creek; McGoldrick logged Slate Creek, and Bogle and Callahan the upper Little North Fork.

LOLO (ST. REGIS DRAINAGE, NOW ON CABINET)

The Polleys Lumber Company logged Rainy Creek and the S. Regis River up as far as Denniemore Creek. They also logged Packer Creek and Brimstone. The Mann Lumber Company took out all the timber from the West and Middle Forks of Big Creek, including considerable green timber. Westfall had a mill setting at Borax and took several million from the upper part of the St. Regis River, largely spruce, which was very severely burned.

CABINET

A number of units near Noxon were logged after the fire, including Pilgrim Creek and Bull River. These were mostly small or medium sales.

There is no clear record of the total amount of fire-killed timber salvaged. Most of what was salvaged was taken out in 1911 to 1914. The total regional cut for these four years was 539 million. Possibly two-thirds of this was fire-killed or fire-damaged timber, which would make the salvage about 300 million out of a total estimated loss of National Forest timber of 5 to 6 billion feet, considerably less than 10 percent.

Most of the operators in fire-killed timber made very little profit. Some of them lost money. For one thing, the Forest Service was somewhat too reluctant to let them skim the cream and take the best timber first. Some good timber was lost while they were cutting less good timber. It is evident that from this experience in salvaging fire-damaged timber there should be little restriction in getting the best first.

The burned timber commenced to check and blue almost immediately. The spruce went first, and by 1912 it was very badly checked. White pine was logged up to 1914, and a little in 1915, though only the largest trees were then merchantable. Fir and larch lasted the longest and some of it was logged for mine timber up to 1918. Very few cedar poles were salvaged, but post timber is still being cut from 1910 burns.

AFTER-EFFECTS OF THE FIRE

The burning of three million acres of timber and young growth, including some of the most valuable white pine stands, was a staggering blow to the National Forests of the Region. The direct loss of that much timber and young growth was not the only loss. It is true that fire breeds fire, and the 1910 fire started a vicious circle which has greatly increased the difficulty of protection since 1910. The burned areas, with heavy snags and dead timber have proved the breeding places of innumerable fire which have burned additional areas and so created new hazards. It is not at all impossible that the burned area since 1910 has been twice as great as would have happened if the 1910 fire had not occurred.

There are not adequate figures on the percentage of the 1910 fire area which has subsequently reburned, but it is probably at least 30 to 40 percent. The heavy dead timber areas have been a continual hazard, and only in the past few years has the hazard started on the down grade, due to falling of snags and growing up of reproduction.

The greater part of the single 1910 burns reproduced, but when they have reburned subsequently, large areas have been taken by brush, particularly in the Clearwater region. Also, many areas which formerly carried white pine or larch and fire have now come into almost pure lodgepole pine stands. This is particularly true of the upper St. Joe and upper St. Regis country.

Immediately following the 1910 fire, there was serious erosion in many places. The fall rains brought down a vast amount of sheet erosion and many steep gullies were scoured out to bedrock. Such streams as the St. Regis River showed the effect of the 1910 burn for many years by irregularity of flow and severe washing and scouring of banks. Such steep canyons as the North Fork of the Clearwater and the Lochsa River have been badly denuded of soil, leaving great expanses of bare granite rock.

Nature is gradually healing the wounds of the fire by tree reproduction or brush, but it will be more than a century before pre-fire conditions are recovered.

Another important influence of the 1910 fire was the fostering of a serious bar-beetle epidemic. Nearly all the scorched trees were immediately attacked by bark beetles, and as a result, an infestation was built up which in 1914 invaded green timber and resulted in the lost of many million feet of whit pine.

Salvage operations begin afer the fires.

Ranger Joe Halm's fire crew at a camp on Timber Creek at the headwater of the St. Joe River in Idaho.

The next few chapters are "stories" from individuals who witnessed the great fire.

"The Big Fire"

by

Joe B. Halm

Out of the underbrush dashed a man- grimy, breathless, hat in hand. At his heels came another. Then a whole crew, all casting fearful glances behind them.

"She coming: The whole country's afire! Grab your stuff, ranger, and let's get outa here!" gasped the leader.

This scene, on the afternoon of August 20, 1910, stands out vividly in my memory. The place was a tiny, timbered flat along a small creek in the headwaters of the St. Joe River, in Idaho. The little flat, cleared of undergrowth to accommodate our small camp, seemed dwarfed beneath the dense growth and windfall, and feebly lent moisture to the thirsting trees along its banks.

For week forest rangers with crews of men had been fighting in a vain endeavor to hold in check the numerous fires which threatened the very heart of the great white-pine belt in the forests of Idaho and Montana. For days an ominous, stifling pall of smoke had hung over the valleys and fire trenches. Bear, deer, elk, and mountain lions stalked starry-eyed and restless through the camps, their fear of man overcome by a greater terror. Birds, bewildered, hopped about in the thickets, their song subdued, choked by the stifling smoke and oppressive heat. No rain had fallen since May. All vegetation stood crisp and brown, seared and withered by the long drought, as if by blight. The fragrance of summer flowers had given way to the tan of dead smoke. The withered ferns and grasses were covered by a hoar-frost of gray ashes. Men, red-eyed and sore of lung, panted for a breath of untainted air. The

sun rose and set beyond the pall of smoke. All nature seemed tense, unnatural and ominous.

It had taken days to slash a way through the miles of tangled wilderness to our fire, sixty-five miles from a railroad. On August 18, this fire was confined within trenches; all seemed well; a day or two more and all would have been considered safe. Difficulties in transportation developed which necessitated reducing our crew from eighty-five to eighteen men.

I had just returned after guiding our remaining packers with their stock to one of our supply camps, when our demoralized crew dashed in. Incoherently, the men told how the fire had sprung up everywhere about them as they worked. The resinous smoke had become darker, the air even more oppressive and quiet. As if by magic, sparks were fanned to flames which licked the trees into one great conflagration. They had dropped their tools and fled for their lives. A great wall of fire was coming out of the northwest. Even at that moment small, charred twigs came sifting out of the ever-darkening sky. The foreman, still carrying his axe, was the last to arrive. "Looks bad," he said. Together we tried to calm the men. The cook hurried the preparation of an early supper. A slight wind now stirred the treetops overhead; a faint, distant roar was wafted to my ears. The men heard it; a sound as of heavy wind, or a distinct waterfall. Three men, believing safely lay in flight, refused to stay. "We're not going to stay here and be roasted alive. We're going."

Things looked bad. Drastic steps were necessary. Supper was forgotten. I slipped into my tent and strapped on my gun. As I stepped out a red glow was already lighting the sky. The men were pointing excitedly to the north.

"She's jumped a mile across the canyon," said the foreman, who had been talking quietly to the men. Stepping before them, I carelessly touched the holster of the gun and delivered an ultimatum with outward confidence, which I by no means felt.

"Not a man leaves this camp. We'll stay by this creek and live to tell about it. I'll see you through. Every man hold out some grub, a blanket and a tool. Chuck the rest in that tent, drop the poles and bury it."

The men did not hesitate. The supplies, bedding, and equipment were dumped into the tent, the poles jerked out, and sand shoveled over it. Some ran with armloads of canned goods to the small bar in the creek, an open space scarcely thirty feet across. Frying pans, pails, and one blanket for each man were moved there. Meanwhile the wind had risen to hurricane velocity. Fire was now all around us, banners of incandescent flames licked the sky. Showers of large, flaming brands were falling everywhere. The quiet of a few minutes before had become a horrible din. The hissing, roaring flames, the terrific crashing and rending of falling timber was deafening, terrifying. Men rushed back and forth trying to help. One young giant, crazed with fear, broke and ran. I dashed after him. He came back wild-eyed, crying, hysterical. The fire had closed in; the heat became intolerable.

All our trust and hope was in the little stream and the friendly gravel bar. Some crept beneath wet blankets, but falling snags drove them out. There was wet air over the water. Armed with buckets, we splashed back and forth in the shallow stream throwing water as high as our strength would permit, drenching the burning trees. A great tree crashed across our bar, one man went down, but came up unhurt. A few yards below, a great log jam, an acre of more in extent, the deposit of a cloudburst in years gone by, became a roaring furnace, a single blast from this inferno would wipe us out. Our drenched clothing steamed and smoked still the men fought. Another giant tree crashed, cutting deep into the little bar, blinding and showering us with sparks and spray, but again the men nimbly side-stepped the hideous meteoric monster.

After what seemed hours, the screaming, hissing, and snapping of millions of doomed trees, and the shower of sparks and burning brands grew less. The fire gradually subsided. Words were spoken. The drenched, begrimed men became more hopeful. Some even sought tobacco in their water-soaked clothing. Another hour and we began

to feel the chill of the night. The hideous red glare of the inferno still lighted everything; the trees still fell by the thousands. Wearily, the men began to drag the water-soaked blankets from the places beneath the fallen trees where they might crawl with their weary, tortured bodies out of reach of the falling snags. The wind subsided. Through that long night beside a man-made fire, guards sat, a wet blanket around their chilled bodies.

Dawn broke almost clear of smoke, the first in weeks. Men began to crawl stiffly out from their burrows and look about. Such a scene! The green, standing forest of yesterday was gone; in its place a charred and smoking mass of melancholy wreckage. The virgin trees, as far as the eye could see, were broken or down, devoid of a single sprig of green. Miles of trees – sturdy, forest giants – were laid prone. Only the smaller trees stood, stripped and broken. The great log jam still burned. Save for the minor burns and injuries, all were safe. Inwardly I gave thanks for being alive. A big fellow, a Swede, the one who had refused to stay, slapped me on the back and handed me my gun. I had not missed it.

"You lost her in the creek last night. You save me my life," he said simply. His lips trembled as he walked away.

The cook had already salvaged a breakfast from the trampled cache in the creek. Frying ham and steaming coffee drove away the last trace of discomfort.

"What are your plans?" asked the foreman, after several cups of coffee.

"First we'll dig out our tent, salvage the grub, and then look the fire over. We'll order more men and equipment and hit the fire again."

Little did I know as I spoke that our fire that morning was but a dot on the blackened map of Idaho and Montana. After breakfast we picked our way through the fire to our camp of yesterday. All was safe. We moved the remaining equipment to the little bar. Our first thought was for the safety of our two packers and the pack stock at our supply camp. The foreman and I set out through the fire over the route of the old

trail, now so changed and unnatural. With ever-increasing apprehension we reached the first supply camp where I had left the packers. Only a charred, smoking mass of cans and equipment marked the spot.

What had become of the men? Not a sign of life could we find. They must have gone to the next supply camp. We hurried on, unmindful of the choking smoke and our burned shoes. We came upon our last supply camp; this, too, was a charred, smoldering mass. Still no signs of the men. A half mile beyond we suddenly came upon the remains of a pack saddle; then another; the girths had been cut. Soon we found the blacken remains of a horse. Feverishly we searched further. Next we found a riding saddle. More horses and more saddles. The fire was growing hotter. We halted, unable to go farther, we must go back for help and return when the heat had subsided.

Smoke darkened the sky; the wind had again risen to a gale; trees were once more falling all about us. We took shelter in a small cave in a rock ledge where the fire had burned itself out. Here we sat, parched, almost blind with smoke and ashes. Once the foreman voiced my thoughts; "The wind will die down toward night, then we can go back to camp." The fury of the wind, however, increased steadily. Fires roared again, and across the canyon trees fell by the hundreds.

After what seemed like hours, we crept out of our cramped quarters and retraced our steps. The storm had subsided slightly. If the remains of the trail had been littered that morning, it was completely filled now. We came to a bend in the creek where the trail passed over a sharp hogback. As we neared the top we again came into the full fury of the win. Unable to stand, pelted by gravel and brands and blinded by ashes, we crawled across the exposed rocky ledges. I had never before, nor have I since, faced such a gale. On the ridges and slopes every tree was now uprooted and down. We passed the grim remains of the horses and supply camps. In the darkness we worked our way back over and under the blackened, fallen trees. Fanned by the wind, the fire still burned fiercely in places. Torn and bleeding, we hurried on, hatless – in the darkness, lighted only by the myriads of fires – picking the way, the foreman watching for falling

trees. While passing along a ledge a great tree tottered above us and went its way to earth, rolling crazily down the slope. We ran for our lives, but the whirling trunk broke and lodged a few feet above. So absorbed were we with our plight that we nearly passed our camp on the little bar in the creek bottom.

By firelight we ate and related our fears as to the fate of the packers. As we talked, one of the men pointed to the easten sky and cried, "Look, she's coming again!" The sky in the east had taken on a hideous, reddish glow which became lighter and lighter. To the nerve-wracked men it looked like another great fire bearing down upon us. Silently the men watched the phenomenon which lasted perhaps ten minutes. Then the realization came that the sky was clearing of smoke. In another brief space of time the sun shone. Not until then did I know that it was only 4 o'clock. A change in wind had shifted the smoke toward the northwest. We later found that the burn extended but a mile or two to the south of us.

Daylight next morning found us chopping and sawing a route back through the now cooled burn toward civilization, searching for our packers. That day I visited a prospector's cabin on a small side creek, a mile from the trail, to learn the fate of the man, a cripple. His earth-covered dugout by some miracle had withstood the fire. There were no signs of life about.

Whether the man had gone out earlier in the week, or had suffered the same fate as our packers, I did not then know. Evening found our little party many miles from camp. We saw the remains of an elk and several deer; also a grouse, hopping about with feet and feathers burned off – a pitiful sight. Men who quenched their thirst from small streams immediately became deathly sick. The clear, pure water running through miles of ashes had become a strong alkaline solution, polluted by dead fish, killed by the lye. Thereafter we drank only spring water.

Late that night, weary and silent, the men returned to camp and crept into their blankets. Daylight again found us on the trail equipped

with packs and food and blankets. About noon we came upon an old white horse, one of our pack string, badly singed, but very much alive, foraging in the creek.

Late one day, the sixth since the great fire, a messenger, be smudged and exhausted, reached us. From him we learned that Wallace and many other towns and villages had burned; that at least a hundred men had lost their lives and that scores were still missing. He had seen many of the dead brought in.

Our crew had been given up as lost. Several parties were still endeavoring to reach us from different points. Ranger Haines with his crew was then several miles back and would cut the trail to take us out. Our packers, he said, had reached safety. The crippled prospector was still among the missing, and we were to search for the missing man. On the third afternoon, weary and discouraged, we stumbled upon the ghastly remains, burned beyond recognition. His glasses and cane, which we found near, told the mute story of the last, great struggle of the unfortunate man who, had he but know it, would have been safe in his little shack. In a blanket we bore the shapeless thing out to the relief crew.

From Ranger Haines I heard the story of our packers. Shortly after I had left them they had become alarmed. Hastily saddling the fourteen head of horses, they had left the supply camp for Iron Mountain, sixty miles away. Before a mile was covered they realized the fires was coming and that, encumbered with the slow-moving stock, escape would be impossible. They cut the girths and freed the horses, hoping they might follow. Taking gentle saddle mare between them, they fled for their lives, one ahead, the other holding the animal by the tail, switching her along. The fire was already roaring behind. On they ran, the panting animal pulling first one, then the other. Hundreds of spark-set fires sprang up beside the trail; these grew into crown fires, becoming the forerunner of the great conflagration. By superhuman effort they reached the summit on the Idaho-Montana state line. Here the fire in the sparse timber lost ground. On sped the men down the

other side until the fire was left behind. Ten miles farther, completely exhausted, they reached a small cabin, where they unsaddled their jaded, faithful little horse, threw themselves into a bunk and fell asleep.

Two hours later the whinnie of the horse awoke them. A glare lighted the cabin. They rushed out; the fire was again all around them! They rescued the little horse from the already burning barn and dashed down the gulch. It was a desperate race for life. Trees falling above shot down the steep slopes and cut off their trail. The now saddleless, frightened little beast, driven by the men, jumped over and crawled beneath these logs like a dog. Two miles of this brought them to some old placer workings and safety. Exhausted, they fell. The fire swept on.

They had crossed a mountain range and covered a distance of nearly forty mile in a little over six hours, including their stay at the cabin – almost a superhuman feat.

Placer Creek Drainage

Returning to Wallace, I learned that the outside world had suffered far more than we. Eighty-nine men had given up their lives in the great holocaust. The hospitals were overflowing with sick and injured. Hundreds had become homeless refugees.

Assigned the task of photographing the scene of the many casualties, I had an opportunity to observe the extent of the appalling disaster and to reconstruct the scene of the last, hopeless stand taken by those heroic unselfish men who gave their lives that others might live. Still, not all those heroic efforts were hopeless or in vain. Ranger Pulaski, who so valiantly saved all but six of a large crew, has become a national hero, an outstanding figure in the annals of forest history.

Forest Supervisor Weigle, who for weeks had so tirelessly worked day and night, unselfishly and alone plunged through the very face of the tempest of fire in an attempt to warn the citizens of Wallace of their danger. At last hopelessly trapped, he rushed through a burning mining mill into a tunnel. As the building fell, the tunnel caved, threatening to bury him alive. Covering his head with his coat, he crawled out, plunging through the burning wreckage into a tiny creek. In a few hours he had worked his way through the fire to Wallace, there directing and assisting with the dead and injured.

Ranger Danielson, who so courageously led his little crew into an open mining cut on a mountain-side, will bear the horrible, purple scars on neck and hands to his grave, as will all those who were with him. Ranger Phillips, Watson, Vandyke, Rock, Bell, and many others saved the lives of hundreds by their cool, timely judgment. Scores of other unsung heroes still live and work among us, their fortitude a bright and last example.

On Big Creek, thirty men lost their lives while others lay prone for hours in chilling waters of a tiny stream, great forest giants falling around and across them. Here three men were crushed by a falling tree. One of these unfortunates was caught only by the foot. Men a few feet away heard his cries and prayers, but were powerless to assist. He dug

and fought to tear away, but the thing which he had come to save held him fast until coma and finally death relieved his sufferings. On Setzer Creek the ghastly human toll was twenty-nine. An entire crew was annihilated. The men fell as they ran before the merciless fire.

Each scene is a gripping story of almost unparallel heroism and sacrifice would take pages to recount. Our experience as compared with these was tame, indeed, insignificant.

More than three decades have passed through the hour-glass of time and nature has long since reclothed the naked landscape with grass, shrubs, and trees, but the great sacrifice of human life is not, can never be, replaced or forgotten.

Our experience with forest fires

By
Mr. Swaine

For days the air had been laden with smoke, flying embers, ashes, singed twigs and moss – some pieces as large as a hand or foot falling promiscuously about. Needles from the fire and pine trees rained profusely through the air, falling like showers upon roofs and the ground. The sound was identical with that of rain. It was evident that fires raging in almost every direction and that day by day they were drawing nearer to us. Our constant prayer was for rain.

It has been said the Divine Providence requires His children to prove every word they utter, and in the thirteen years of my residence in the Coeur d'Alenes, it has been a constant boast with me that the wind never blows here; and the frequent, abundant, delightful showers keep everything fresh, lovely and beautiful. But alas! The wind CAN blow in Idaho and weeks can pass without rain as had been proven in the weeks of drought.

In the distance, the reflection of the ruddy glow in the sky and the great crimson sun, seeming to stand out like a gigantic, blood-red orange; a perfect sphere at which one could gaze with ease through the smoke, had been a most beautiful and awe-inspiring sight. The mighty roar of the burning forest resemble the sound of a storm at sea, as expressed by those familiar with that sound. The splendor of the scene was transformed into terror on Saturday, August 20, 1910, when the fires were so near that we were forced to realize that our little village was in imminent danger and that a strong wind might at any moment prove our destroyer. Before three o'clock p.m. it became so dark from smoke,

we were obliged to turn on the lights. Bats blew about thinking the night had arrived, and indeed it was enough to make anyone batty. The air became hot and oppressive and the reflection of fires all around us made danger feel uncomfortably near. The falling fragments were now veritable brands, many of the great twigs bearing live fires; and all agreed that our worst fears were about to be realized. Groups of men began congregating at street corners discussing the scene and a sort of reverential silence seemed to have settled upon the place. About fire o'clock the business houses and streets were given a thorough soaking by means of the fire hose, as had been done each day for weeks. Every dwelling received a similar application with a garden hose and from that moment it was a constant conflict with a furious enemy for two nights and two days. With the evening came the wind from the south carrying the Red Terror toward us. Telephones became active, people began discussing the situation seriously, and altogether, a spirit of intense alarm supplanted that of awe. Among those mighty mountains which seemed one mass of flames were many precious lives, we knew; firefighters and prospectors, and we wondered how they could possibly escape.

Night came on with its added darkness. The screeching, fiendish roar of the fire increased. The flames were headed right for us. Wallace, the metropolis of the Coeur d"Alene's, just seven miles west was suffering a worse fate. That town was already on fire, and believing the outlet eastward most accessible, hospital inmates and women and children were hurried by special trains through Mullan toward Missoula. Many of our frightened inhabitants, mostly women and children, took advantage of these trains and left our stricken town. It was noticeable that the few men who chose to go were the foreign element employed in the mines, who had nothing to lose but could carry in a suitcase their savings which would eventually drift back to the fatherland regardless of conditions.

Our brave, courageous citizens turned out enmasse and successfully backfired the path of the flames and by three o'clock a.m., Sunday morning, danger from that direction seemed over, but half of Wallace

had been wiped out, the wind had changed and their fire was traveling this way. As yet, the river was between it and us. Telephone poles had burned as well as part of the railroad track, cutting off all communication aside from what could be ascertained by messengers on horseback.

About five o'clock a.m., the wind subsided and danger seemed over for the moment, the worn citizens started home for a few hours' rest when their attention was arrested by an appalling sight. Thirteen burned, blackened, almost charred men, holding their painful hands in the air, scarcely knowing how or where they were going, yet aiming for one goal, the physician's office, came hastening into town. They were fire-fighters who had been sent out days before, to arrest, if possible, the progress of the fires. All but two succeeded in reaching town, but the agonies of these poor men can only be realized by those who witnessed their writhing and expressions. Two physicians, assisted by willing volunteers, hastily did all that was possible to relieve their suffering. A temporary hospital was prepared in a vacant store building and the wants of the sufferers satisfied as far as circumstances permitted.

By eight o'clock a.m., the wind resumed its zeal from the west. The fire jumped the river and was covering the ranges west of us and traveling northward. The heat, smoke and humidity were almost unbearable. Conveyances of every description were pressed into service and women and children hurried across the burned district to special trains west of Wallace waiting to carry refugees to safety. The day was like a horrible night, but through the trying hours was that dread of another even more terrible night to come. All too soon it came and those of us who witnessed it have termed it the "Night of Terror."

The wind came up with a fury. It seemed to blow in whirls carrying sparks in every direction. But the general trend was northeast. As if by magic, new fires would spring up here, there, and everywhere. In every direction a mountain of flame faced us. One side of a gulch would be aflame and in an instant the fire would be borne across to the other side, and by leaps and bounds from tree to tree, the terrible destruction continued.

Those familiar with the location of our little village can, in a measure, picture the scene. Others never can. The mountains so high and steep with the narrow gulches between, resembled curtains of fire suspended from the clouds. Absolute property loss seemed positive but we believed our lives could be saved.

Every emergency reaches a crisis; and when the extremity arrives, the last resort is adopted. Consequently, when fires had completely surrounded us, and were crowding within a few feet of our doors, and sparks raining like water, it was unanimously agreed that the town must surely go unless the entire west, north and east could be protected by backfires. The tops of the mountains in these directions were already a mighty billow of flame showering their sparks and brands upon the town below.

Those familiar with forest fires know how much faster fires travel up than down a mountainside. Hence a fire started almost against the houses would travel with a fury up the hillside meeting the surging flames in the timber thus clearing the space passed over and leaving a burned district upon which burning fragments might fall without danger. If backfires take the desired course, all is well; but should they be reversed or misdirected by the wind as is often the case, they are only an added menace. It took courage to start more fires with surrounding country already a seas of fire and the wind a veritable fury, but it was our only chance; so a line of men were stationed just a few feet apart, forming a letter S, from the Morning to the Hunter mills, just a few feet in the rear of the buildings. At the signal each started a blaze. These fires united in less time than it takes to relate it, and traveled up the mountains, leaping, foaming, rippling over the brush and grass, then bursting into crimson towers as they passed over stately pines and firs. It was a most beautiful sight yet a most terrible one. The mountains south were still on fire. There was now no outlet. Fancy a deep bowl which is completely lined with seething flames, yourself a spectator in the center, and you can in some degree conceive the scene. The screeching, furious howl of the fire, the heat and grandeur withal,

was suggestive of the infernal regions, something unreal, unnatural, as our dear, clam Scotch friend who was so unfortunate as to be our guest at that time expressed is "uncanny." Much of the smoke was carried onward by the high wind. Midnight was as light as day. The mountains never appeared so high as with their blanket of fire and never impressed us as such barriers.

At last the morning dawned. The wind subsided, and with the dawn our prayers of gratitude went forth. The terror had passed. Not a precious life had been sacrificed and not a home consumed. It seems too good to be true. We could scarcely believe it ourselves. We found people asking us and ourselves asking each other how the town had escaped when the fire had passed right over our heads. The reply is as follows: The water supply was unlimited and was most economically and advantageously used; the constant drenching prior to the arrival of the fire and during its presence made things less tangible, but last and best of all was the united, well-managed, thoroughly systematized course pursued by the volunteer fire department and willing citizens, headed and superintended throughout by William Coumerilh, whose council was sought in every instance and whose advice was at no moment disregarded. He seemed to be everywhere at all times with encouragement and assistance for the tireless workers who toiled with him three days and two nights without a moments sleep or rest.

An admirable feature of the entire ordeal was the calm, stolid reserve which seemed implanted within each soul. With absolute ruin, destruction and poverty, possibly death staring people in their faces, there was no indication of hysteria or a panic at any time.

You will wonder what we were doing all this time. Our guest, Mrs. Swaine, the children and I spent our time serving meals to the firefighters who could not leave their posts except in small relays. However, there came an hour when we bade farewell to the little home, the heat and smoke forcing our departure, and sought a place of safety each with a blanket for protection, quite reconciled to the loss of everything if only our lives might be spared. We took refuge in the schoolhouse – a

brick structure situated on a roomy cleared space near the river. This we thought would be the last place to burn although there was danger of suffocation. We remained only about three hours when we returned duly and truly thankful for the tableful of dirty dishes which greeted us and truly thankful for a sink in which to wash them. We all felt very benevolent after the ordeal and allowed the vagrant livestock, driven as we had been from their homes, to graze unmolested upon our lawns. And we realized as never before, how affliction reduces us to a common level. We had all been one united in a single cause, that of saving our all, be it a pocket knife, a home or a fortune. And I echo Mrs. Swaine's remark: " It was a terrible ordeal, but I wouldn't have missed it for anything."

UNITED STATES DEPARTMENT OF AGRICULTURE
FOREST SERVICE
NORTHERN REGION

ADDRESS REPLY TO
REGIONAL FORESTER
AND REFER TO

FEDERAL BUILDING
MISSOULA, MONTANA

0
Special
St. Maries Burial Plot

January 27, 1933.

Forest Officers:

Finally, there has been acquired a central burial ground for forest workers killed in line of duty. The new plot of ground is at St. Maries, Idaho, and lies contiguous to the large plot of graves of firefighters killed in the 1910 fire.

In the future it is planned to make interment in this cemetery of the remains of any Forest Service worker in the Region, not claimed by relatives, and Forest Service officers are requested to bear this in mind if it falls to their lot to arrange for burial of any victims falling in this classification. The approval of the Compensation Commission must be secured for transportation of bodies from other points to St. Maries. After such approval communication should be immediately established with the Forest Supervisor at St. Maries, Idaho, who will make final arrangements for these burials.

This spring, the remains of firefighters already buried in potters' fields or in isolated and uncared-for graves are to be transferred to the new cemetery. There are definite records of such graves at Newport, Washington, Priest River, Idaho, and Noxon, Montana. While this letter is primarily informative, it will be appreciated if any Forest officer having knowledge of similar graves elsewhere, notify this office before the first of April.

Very truly yours,
L.C. STOCKDALE,
Assistant Regional Forester

OFFICIAL REPORT OF 1910 FIRES

6/24/1911

COPY

Wallace, Idaho, June 24, 1911

00

Coeur d' Alene – Fire

District Forester.

Missoula, Montana

Dear Sir:

The following is a report relative to the men who lost their lives fighting fires on the Coeur d'Alene National Forest on August 20 and 21, 1910:

The season of 1910 was the driest season in northern Idaho known to the oldest settlers. With the exception of a few light showers there was no rainfall in this region from April 1 to October 1, 1910. The Forest fires on the Coeur d'Alene National Forest began in April, and during the months of May and June they were numerous but owing to the fact that humus covering the ground had not yet thoroughly dried out we were able to extinguish all of the fires that occurred during these months. The continued dry weather however by the 15th of July made the conditions so very bad that even though a fire was apparently extinguished a crew had to be kept constantly on the fire line owing to the fact that the fire would smoulder underneath the ground and could not be fully extinguished. By this time new fires were starting at various points throughout the Forest practically every day, caused chiefly by sparks from railroad engines, settlers burning brush and careless campers.

On July 23 a severe electric storm, with practically no rain, passed over this region, setting numerous fires throughout the entire district. On the morning of July 24, by special orders the rangers throughout the Forest

were looking for electric fires and were successful on July 24, 25 and 26 in extinguishing nine fires set by lightning. Five others however started by the same cause in extremely inaccessible places far away from trails and roads attained such proportions before getting crews of sufficient size to them that it was impossible to put them immediately under control. Many of these fires were in such inaccessible places that provisions had to be packed to the men on men's backs until a trail could be cut within reach of the fire. This condition always weakened the fire fighting force at the start when the heavy crew was most needed and would be most beneficial. From this time on practically every day brought news of new fires, starting largely from brands blowing from the other fires. On August 13, even though the nearest fire in a straight line was six miles from Wallace, numerous pieces of burning bark as large as a man's hand fell in the streets of Wallace, setting awning on fire in three different cases. This condition of course maintained throughout the timbered areas within reach of all fires. By this time we had, besides two troops of soldiers, about eighteen hundred men fighting forest fires on the Coeur d'Alene National Forest, and we felt that everything was in good condition owing to the fact that we had fire lines practically around all of the fires and there is not any question whatever that had there been normal conditions we would have been successful in stopping all of these fires without any great loss of timber. On August 20 however a heavy wind arose about noon, blowing toward the northeast, which brushed up all of the fires to such an extent that it was impossible to hold them within the confines of the fire trenches dug around the fires. These fires not only swept over the fire lines, but the stiff breeze that was blowing became intensified by the heat of the many fires until throughout this fire region the wind attained hurricane proportions, scattering the fire to such an extent that new fires started in thousands of places, often following the tops of the trees for miles before it would meet some open country to stop it. The enclosed photographs show the intensity of the wind at this time and the character of the destruction now to be found on many thousand of acres. These were the conditions that led to the loss of life of the fire fighters.

All the fire firefighters were in the charge of men who knew every trail, stream and open place in the region, but owing to the fact that the severe windstorm started up thousands of new fires within a short time it made little difference which direction the men were taken, as new fires were springing up all around them which made their escape impossible. Although the fire fighters were distributed over the entire region from the head of the St. Joe river to the head of the Coeur d'Alene river, a distance of practically on hundred miles, the loss of life occurred wholly within the region between Wallace and the St. Joe river, where the storm conditions seemed to be much worse than anywhere else.

The man who had charge of the several unfortunate crews were E. C. Pulaski, Forest Ranger: John W. Bell, Forest Ranger: William H. Rock, Assistant Forest Ranger: R. M. Debitt, Assistant Forest Ranger: L. A. Hollingshead, Forest Guard: James Danilson, Forest Guard, and S. M. Taylor.

Note: *The following information through page 81 about key individuals in charge of crews appears previously in the historical account of the 1910 fire and is repeated here to preserve the integrity of the Official Report of June 24, 1911.*

Mr. Pulaski, who is about forty years of age, is a man of most excellent judgment, conservative, thoroughly acquainted with the region, having prospected throughout the burned area during the last twenty-five years, and is considered by the old timers in the region as on of the best and safest men that could have been placed in charge of a crew of men in the hills. Mr. Pulaski was in charge of about one hundred fifty men distributed over a distance of several miles along the divide between Big Creek of the Coeur d'Alene river and Big Creek of the St. Joe river. When the danger conditions became imminent he rounded up about forty of his men who were in the danger zone and cut off from safety on the west side of the fire where the other men were located and started with them down the mountain toward Wallace,

a distance of ten miles. When he got about half way however he found that he was cut off be new fires. At the sight of this his men became panic stricken, but he assured them that he would still get them to a place of safety. Being thoroughly familiar with the region he knew of two prospect tunnels near by, the shorter being about fifty feet in length and the longer about one hundred feet in length. Not being certain as to whether or not he could reach the largest and safest, by putting a wet gunny sack over his head he penetrated the dense smoke to where he could see the largest tunnel, and finding it was safe he rushed back to his men and hurried them to the tunnel, getting them there just in time to get them inside before the fire reached them. The portion of his crew with him consisted of forty-two men and two horses. He got all of his men and horses inside of the tunnel, with the exception of one man who had fallen a few hundred feet behind and was caught by the fire before he could reach the tunnel. The intense heat caused by the forest fire outside of the tunnel caused the cold air of the tunnel to rush out and the smoke and hot air to rush in. The timbers supporting the tunnel caught fire and Pulaski stood as near to the mouth of the tunnel as he could, and from a little stream that flowed from the bottom of the tunnel dipped water with hit hat to dash upon the burning timbers, until he was badly burned and fell unconscious. Prior to becoming unconscious himself he had commanded all his men to lie on their faces for protection. All of the men were evidently unconscious for portion of the time. One of the men however having sustained less injury then the others, recovered to the extent that he was able to crawl out of the tunnel, and the fires by this time had subsided sufficiently for him to drag himself into Wallace and notify the Forest Office. This was about three o'clock in the morning. A crew was immediately sent to the tunnel and all of the men and the horses were removed. Although nearly all of the forty-two men were still helpless condition after being taken to the hospital in Wallace, they rapidly recovered their strength, with the exception of five who had smothered before they were reached. The two horses although still living, were in such bad condition that they were immediately shot. The man who failed to get into the tunnel was

burned beyond recognition. Had not Pulaski know the location of this tunnel everyone of the forty-two men in his crew would have perished.

Mr. John W. Bell is a man of about thirty-five years, thoroughly acquainted with mountain conditions, having spent a large part of his life in this western country. He is conservative and thoughtful and an all around man of the mountains. He had his crew, consisting of about fifty men, working in conjunction with Pulaski's crew at the head of the middle fork of Big Creek. When the terrific windstorm arose and fires were started in many new places he sought safety on a small clearing on the homestead claim of Joseph Beauchamp. Under ordinary conditions this place, consisting of a clearing of about two acres, would have been sufficient to offer protection. A small stream flowed through the opening and some of the men protected themselves by lying down in the stream, while seven sought shelter in a small cave that had been dug for the purpose of storing the belongings of Mr. Beauchamp. The terrific storm that preceded the fire by about a minute, which was of course intensified by the fire, overturned and broke off practically every tree of a dense forest in this region. The seven men who sought shelter in the cave were burned beyond recognition and three others who were in the stream were killed by a falling tree. This constituted the number of dead of this crew, but the remainder who sought shelter in the creek had their hair burned off the back part of their heads and the skin all burned from their necks, besides being nearly suffocated from the smoke. One of those injured men made his way into Wallace, a distance of twelve miles, by nine o'clock on Sunday morning, the day after they were injured. Judging from the distress of the men in Pulaski's crew I had already put a crew of seventeen men to work cutting out a trail leading to this point, an upon learning the condition of the men I immediately sent out two doctors on foot, with a crew of men with medicines, blankets and provisions, to help the injured men. It required a crew of seventeen men working all day Sunday, Sunday night, Monday and Monday night to open the trail to the injured men twelve miles from Wallace. This enabled me to get pack horses into the injured men and they were brought to Wallace.

With the exception of the two men who had friends at this place the dead men were buried near the spot where they died, a few days later. Reverent Carter, a Congregational minister at Wallace, volunteered to go along with the burial crew to give Christian burial to the dead. All of this crew, with the exception of the ten men who were killed, speedily recovered from their injuries at the hospital in Wallace.

Mr. William H. Rock is a man about twenty-five years of age, having served for two years in the region in which he was fighting fire; therefore he was thoroughly acquainted with the details of the region where his men were working. He had a crew of approximately seventy men about six miles northeast of Avery, Idaho. When the terrific windstorm arose and the fires started up in many places he found he was cut off from getting his men out to Avery. Therefore he led them to an area that had burned over the day before. This proved to be a place of absolute safety and all the men came out uninjured. As evening drew on the fires were burning up so terrifically that huge columns of smoke which contained large quantities of combustible material would frequently burst into flames that would shoot into the sky for thousands of feet. This, some of the men told later, frightened Oscar Weigert to the extent of his wanting to kill himself. He however left the crew without anymore knowing it at the time, and even though tow shots were heard no one knew that he had taken his life until the following morning. Mr. Rock had his crew in perfect safety, and the unfortunate happening to Mr. Weigert was a matter entirely beyond the control of Mr. Rock who was in charge.

Mr. Debitt is about thirty-five years of age. He was in charge of the district during the last four years, having headquarters within six miles of where the men perished; therefore was thoroughly acquainted with all the conditions which might have led to the protection of the men. Owing to the fact that he had general charge of the district he was away from the men when they perished, but a few hours preceding this, seeing that danger was imminent, he sent Charles Sullivan, who was then serving as Deputy Sheriff at Avery, into where about seventy men were working on Setser Creek, telling them to come out to Avery

immediately as there was danger of being hemmed in by the fire. All of these men came out with the exception of twenty-eight who thought there was no danger and refused to come. All of these twenty-eight were burned beyond recognition a few hours afterward. These men were all wrapped in blankets and sewed in heavy canvas and buried where they were burned.

Mr. Hollingshead is about twenty-two years of age. Although a young man, he as always exercised good judgment. He is conservative and had served as Forest Guard in the immediate region in which he had charge of men for two years; therefore was thoroughly familiar with the country. He had charge of a crew on the west fork of Big Creek fighting a fire that was coming northeast from Trout Creek. He had a crew of about sixty men. When the terrific winds scattered the fires all over the region and they discovered that they were surrounded by fire all of his men, with the exception of nineteen, worked through the fire line to a place of safety on an area that had previously burned over. Nineteen of these men, being thoroughly panic stricken, rushed down the hill ahead of the fire to a little cabin where five pack horses were stationed. They found that the fire was all around them. They went into the cabin and remained there until the roof began falling in. They rushed our this and tried to break through the fire line, but the fire was so terrific that eighteen out of the nineteen perished in the flames within a few feet of the cabin. The nineteenth man accidentally worked his way through the fire line and came out to the St. Joe two days later with all of the skin off of his face and hands and his clothing practically burned from his body. After six weeks in the hospital this man fully recovered. Mr. Hollingshead the next day went into the place where those men perished and found eighteen men, five horses and a large black bear that had perished in the flames all at the same place. The men were wrapped in blankets and canvas and buried where they perished. They were all burned beyond recognition.

James Danilson is a young man about twenty-two years old. Although young he was thoroughly acquainted with woods work and

had been over the region many times where his crew was located; therefore was thoroughly familiar with the location. He had eighteen men in his crew. When he found he was surrounded by fire he took his men to an open park near the timber line which contained a light covering of bear grass. They burned off a large area in this park, thinking that by so doing they would absolute protection, and the general appearances would indicate that they did have protection of the very best kind. When the terrific fires however approached this area, instead of stopping when the burned area was reached, as would be expected, they continued to burn over the same area the second time. The men in Danilson's charge had their blankets with them over their heads until the flames had practically consumed them. One of the men, however, by accident inhaled the flames and perished on the spot. The other men were very badly burned about the face and hands. The fire reached these men about nine o'clock Saturday evening. Early Sunday morning Mr. Danislon, although badly injured, worked his way into Mullan, a distance of five miles, and delivered the news. Pack horses were immediately sent to the place and the men, although badly injured were brought to Mullan and given medical attention at Dr. Keys' office before they were brought to Wallace at 2 P.M. by special train which I received through the kindness of the Northern Pacific Railway Company. These men were all placed in the Wallace Hospital, where they remained from one to six weeks, all recovered with the exception of three men who have still hands.

S. M. Taylor is a man of about forty years of age and a conservative, intelligent fellow, thoroughly able to handle men and a prospector in this region for many years. He had charge of the Bullion fire along the Montana-Idaho line east of Wallace. When Mr. Taylor discovered that he was surrounded by fires he took his crew, consisting of about sixty men, to the tunnel of the Bullion Mine, which seemed to Mr. Taylor to offer absolute protection. One of the men, Mr. Ryson, who was with the crew, knew the tunnel thoroughly owing to the fact that he made it. Most of the crew who went into the tunnel passed an overhead air shaft. Eight of the men however did not do this and the

smoke rushed in to where these eight men were located and suffocated them. The remaining crew came out a few hours afterward without any injury; neither had they experienced any inconvenience during the time they were in the tunnel. Mr. Taylor immediately notified me of the conditions and although this was within about four miles of the Northern Pacific Railway, several large trestles along the mountain had burned out; therefore I could not depend wholly upon the railroad to bring these dead men to Wallace, so I sent a crew a men the next day to bury the dead bodies. About ten days later, when the railroad was sufficiently repaired on both sides of the mountain to make it more convenient for handling the bodies, I sent a crew of men to the place with pack horses to disinter the bodies and bring them to the railroad, where through the kindness of the Northern Pacific Railway Company a special car brought them across the mountain to Dorsey. At this point a trestle was still not replaced and the dead bodies were transferred to another special train sent out from Wallace. The bodies were delivered at the morgue at Wallace and prepared for burial and a few days later they were given Christian burial in the Wallace cemetery.

The following is a list of the men who perished in the fires, the list being followed by specific statements concerning each man.

COEUR D'ALENE NATIONAL FOREST

SETSER CREEK FIRE

R. M. Debitt, Asst. Forest Ranger in Charge

1. George Smith	$21.25
2. Geo. A. Blodgett	$51.00
3. James Kerr	$39.50
4. Harry Jackson	$ 5.50
5. L. Ustlo	$41.75
6. James Donahue	$19.25
7. Frank Sanders	$ 5.50
8. Patrick Grogan	$51.50
9. Larry Levar	$39.00
10. M. Phweiser	$39.00
11. J. Rusick	$42.00
12. M. Dilo (May be Frank Polick)	$ 5.50
13. Jack Hill (May be J. B. Pease0	$ 5.50
14. O. Bing (Oscar Burg)	$ 5.50
15. Ed Murphy	$21.50
16. H. Sipheas (Harley Siphers)	$ 5.50
17. Ralph Ekhoen	$ 6.00
18. Frank Skeychell (Frank Getchell)	$ 5.50
19. Ed Dunn	$41.00
20. W. F. Norton (May be Frank Polic Or Joe Jappa)	$ 5.50
21. L. Schwartz	$ 5.50
22. W. H. Baker	$ 5.50
23. Frank Masterson	$40.50
24. George McGurk	$39.00
25. O. Ellefson (O. Ellefseu)	$38.75
26. F. D. Swick	$ 5.50

71. Ernest Elgin	$10.00

AVERY FIRE

W. H. Rock, Asst. Forest Ranger, in Charge

72. Oscar Weigert	$15.00

Many of the men who perished in the fires on the Coeur d' Alene National Forest in August, 1910, are still unidentified, and the chances are that we never will be able to identify them. The fact that we are unable to identify them may seem strange to anyone not familiar with the conditions. Of the men used in fighting forest fires were men who were floating around through the country apparently having no home. Many of the men passed under assumed names, and through the great stress for time the precaution was not taken when they were hired to have them give a statement concerning their relatives or home address, if they had any. The only thing we have to go by is the name of the man as taken from him or placed upon our time books. We received many of the men that we employed from the employment agencies of Spokane and Butte, and these employment agencies have nothing to show further than the name of the man. We have written hundreds of letters and followed up every trace that might lead to the identification of the men, but we feel certain that there are a number of men who perished that will never be identified.

The following information is everything we have regarding them at the present time:

SETSER CREEK FIRE

R. M. Debitt's Crew

---

1. GEORGE SMITH.

Home is Missoula, Montana. Identified by Thomas Murphy, San Jose, California. Mr. Smith's father came to Avery a short time after his death for the purpose of removing the body, but he found that he could not do it at that time. Since then we have been trying to correspond with Mr. Murphy and Barney Smith, father of the dead man, but have been unable to reach them up to the present time.

The effects found upon Mr. Smith consist of one silver watch, open face, 25 jewels, Columbus Kind make. Watch in Wallace office.

Buried on Setser Creek.

Time

Aug. 16 – 12 hours
17 – 12
18 – 13
19 – 12
20 - 24
21 - 25

85 hours, $21.25 amount due.

2. GEORGE A. BLODGETT.

His father, Henry Blodgett, of Willet, Cortland County, N. Y. and his mother, Elizabeth Blodgett, Whitney Point, Broome, Co., N.Y., R.D. No. 1, were notified of their son's death, and they have executed the necessary papers to receive the amount due their son.

Time		
Aug.	4 – 10 hours	13 - 11
	5 – 11	14 – 12
	6 – 11	15 - 13
	7 – 11	16 - 12
	8 – 12	17 – 13
	9 – 15	18 - 13
	10 – 11	19 – 12
	11 – 12	20 – 13
	12 – 12	204 hours, $51.00 amount due

3. JAMES KERR.

Address Lewiston, Idaho. Wife found. Died on Setser Creek, buried on Setser Creek. Wife communicated with Lewiston, Idaho. Mrs. James Kerr.

Time		
Aug.	9 – 11 hours	15 - 13
	10 – 13 hours	16 – 12
	11 – 12	17 - 13
	12 – 12	18 – 13
	13 – 11	19 - 12
	14 – 12	20 - 12
		21 – 12

158 hours, $39.50 amount due, which was paid to wife, Mrs. James Kerr, at Lewiston, Idaho (Vo.No. 900).

4. HARRY JACKSON.

Address, Tacoma Washington. Identified by Harry McCarthy, Whose Address is not known. McCarthy claims to be cousin of deceased. Identified by Ed Besset by heel plate worn on shoe. Wrote to Mayor of Tacoma to look up this man but received no reply.

Time

Aug. 20 – 10 hours
21 – 12
22 hours, $5.50 amount due.

5. L. USTLO.

Name may be Ustolos or U. S. Tole. Address unknown. Effects, gold watch with dealer's name, Sloan and Froinburg, Ironwood, Michigan. Buried on Setser Creek. Was a foreigner. This man was a tall and well-dressed Finlander. Effects, pocket knife and watch sold by Sloan and Froinburg, Ironwood, Michigan. Open face gold watch, 17 jewelled adjusted, called "The Accurate Time." Manufactured by the Cosmopolitan Watch Co., U.S.A., works No. 1349879, case No. 1044055, Watsworth case.

Wore lace belt and picture. Scar on right knee. Have so far been unable to get clue as to this man's identity.

Time

Aug.	9 – 11 hours	12 – 15	
	10 – 11	16 – 12	
	11 – 12	17 – 13	
	13 – 11	20 - 12	
	14 – 12	21 – 12	
	15 – 21	167 hours, $41.75 amount due.	

6. JAMES DONAHUE.

Address unknown, no known friends. Effects, pocket knife, bowl of pipe, axe stone, tobacco, pipe and stone and pocket knife found on body. Identified by these. Probably from Havre, Montana. Wrote Mayor of city.

Age about 50 years. Height, 5 ft. 10 in., light blue eyes, inclined to be weak, hair sprinkled with gray. Wore calked boots, smooth shaven, thought to be a lumber jack by trade. No reply from mayor of Havre, Montana.

Time

Aug. 16 – 14 hours
17 – 14
18 – 13
19 – 12
20 – 12
77 hours, $19.25 amount due.

7. FRANK SANDERS.

Address unknown. No known friends. Worked for a time for B. R. V. I. Co. in Ravalli County, Montana. This company has been written, but they know nothing about the man. On body were found a note book partly burned, and special road tax receipt for 1910, and poor tax receipt for year 1910, Ravalli Co., Montana. Note book gives address as Ravalli Co., Montana. Also gives name of Sam Blazer. Worked for B. R. V. I. Co. from about March 19 to Aug. 1, 1910. Wrote to Milwaukee and to places in Indiana, but received no reply. Name in note book which looks like Miss Murther, Center, Indiana. Wrote to Post Master, Center, Indiana, but received no reply.

Time

Aug. 20 – 10 hours
21 – 12
22 hours, $5.50 due.

8. PATRICK GROGAN.

Address, Butte, Montana. Body shipped to Butte, Montana, to his daughter, Mrs. Dolan, Hotel Reilly, 222 Dearborn St., Butte, Montana.

Time

Aug.	6 – 12 hours	14 - 12
	7 – 11	15 - 12
	8 – 16	16 - 24
	9 – 11	17 - 13
	10 – 11	18 - 13
	11 – 12	19 – 12
	13 – 11	20 – 24

206 hours, $51.50 due

Mrs. Dolan and Mrs. Kline, daughters of Patrick Grogan, decreased, were paid $51.50 on account of services of their father.

9. LARRY LEVAR.

Buried on Setser Creek. Identified by M. J. Merrick, 223 Howard St., Spokane, Washington. We have corresponded with his mother, Udova Maria Levar, Posta Hreljin Silo Zastene, Europa, Austria, Hivatsko Primorji, The necessary papers have been sent to his mother for execution, so that the amount due him from the Government may be paid to her.

Time

Aug.	9 – 11 hours	14 - 12
	10 – 11	15 - 13
	11 – 12	16 - 12
	12 – 12	17 - 13
	13 – 11	18 - 13
		19 – 12
		20 – 12
		21 – 12

156 hours, $39.00 due.

10. M. PHWEISER.

Address unknown. Buried on Setser Creek. No clue to this man's identity.

Time	
Aug. 9 – 11	15 - 13
10 – 11	16 - 12
11 – 12	17 - 13
12 – 12	18 - 13
13 – 11	19 - 12
14 – 12	20- 12
	21 – 12

156 hours, $39.00 amount due.

11. J. RUSICK.

Buried on Setser Creek. Address unknown. Identified by M. J. Merrick, Spokane, Washington. On May 27, 1911, we wrote the Imperial and Royal Austro-Hungarian Consul, Denver, Colorado, for information regarding father of J. Ruzic, who, we are informed, is Stjepan Ruzic, post office Hrejin Hrvatsko Primorje, Hungary. If it is determined that he is the father of J. Rusick a voucher and affidavit will be sent to him through the Anstro-Hungarian Consul for his execution.

Time	
Aug. 9 – 11	16 - 12
10 – 11	17 - 13
11 – 12	18 - 13
12 – 12	19 - 12
13 – 11	20 - 24
14 – 12	21 - 12
15 – 13	

168 hours, $42.00 amount due.

12. M. DILO.

Address unknown. Buried on Setser Creek. No clue to this man's identity.

Time
Aug. 20 – 10 hours
21 – 12
22 hours, $5.50 amount due.

13. JACK HILL.

Buried on Setser Creek. Mrs. J. C. Hill of Seattle thinks that this man was her son, Richard Hill. We sent her a photograph of the man, but she is still not quite positive as to the identification.

Time
Aug. 20 – 10 hours
21 – 12
22 hours, $5.50 amount due.

14. O.BING.

Address unknown. Buried on Setser Creek. No clue to this man's identity.

Time
Aug. 20 – 10 hours
21 – 12
22 hours, $5.50 amount due.

15. ED MURPHY.

Address unknown. Buried on Setser Creek. No clue to this man's identity.

Time		
Aug	15 – 6 hours	19 – 12
	16 – 12	20 – 18
	17 – 13	21 – 12
	18 – 13	86 hours, $21.50 amount due

16. H. SIPHERS.

Home in Mercur, Utah. Harley Leroy Siphers, 20 years of age, hair nearly black, slightly pock marked, height about 5 ft. 8 ½ in. Wore #8 or 9 shoe. Buried on Setser Creek, body No. 5. J. W. Siphers, Wallace, Idaho, called at office and found photograph with effects, which he identified. Effects: 2 dimes, 1 nickel, 1 Ingersol watch, 1 photograph button. Turn over to brother.

Shipped from Missoula, Aug. 19 at 9:20 P.M. for Avery, Idaho. Brother claims to be only living relative.

Time	
Aug.	20 – 10 hours
	21 – 12
	22 hours, $5.50 amount due.

Voucher and affidavit in favor of J. W. Siphers, brother sent to Missoula for payment Vo. No. 1458.

17. RALPH EKHORN.

Address unknown. Buried on Setser Creek. No clue to this man's identity.

Time

Aug. 20 – 10 hours
21 – 12
22 hours, $6.00 amount due.

18. FRANK SKEYCHELL.

Address unknown. Buried on Setser Creek. No clue as to his identity. This man may be Frank Getchell, Basin, Montana. Mr. L. G. Huntley of Basin, Montana, writes inquiring about a man that name started to fight fires. Letter written to Mrs. Huntley requesting photograph or further information but no reply to letter has been received.

Time

Aug. 20 – 10 hours
21 – 12
22 hours, $5.50 amount due.

19. ED. DUNN.

Buried on Setser Creek. Numerous traces followed up by letters but no identification.

Time

Aug.	9 – 11 hours	16 – 12	
	10 – 12	17 – 13	
	11 – 12	18 – 13	
	12 – 12	19 – 12	
	13 – 11	20 – 18	
	14 – 15	21 – 12	
	15 – 12	164 hours, $41.00 amount due	

20. W. F. NORTON.

Address unknown. Buried on Setser Creek.

Time
Aug. 20 – 10 hours
21 – 12
22 hours, $5.50 amount due.

21. L. SCHWARZ.

Buried on Setser Creek. Louis Schwarz, father of L. Schwarz, noticed his son's name in the list of dead published in the paper, and through the German Consult at Seattle we have established his identity, and vouchers and affidavits have been sent to his father for execution.

Time
Aug. 20 – 10 hours
21 – 12
22 hours, $5.50 amount due.

22. W. H. BAKER

Buried on Setser Creek. We wrote to Mrs. Martha Bachus, Box 372 Luverne, Minnesota, and through her we have established the identity of W. H. Baker, she being a sister. She states that his brother and father are living in San Antonio, Texas. We have again written to Mrs. Bachus for further information concerning the identity of this man.

Time
Aug. 20 – 10 hours
21 – 12
22 hours, $5.50 amount due.

23. FRANK MASTERSON.

Buried on Sester Creek. Was identified by Dock Materson of St. Croix Fall, Wisconsin. Mary Masterson, mother of Frank Masterson, deceased, who lives in St. Croix Falls, Wisconsin, R. F. S. No. 2, has been paid $40.50, the amount due, by voucher No. 1328.

Time		
Aug.	9 – 11 hours	16 – 13
	10 – 11	17 – 13
	11 – 12	18 – 12
	12 – 14	19 – 12
	13 – 15	20 – 12
	14 – 13	21 – 12
	15 – 12	162 hours, $40.50 amount due.

24. GEORGE McGURK.

Address unknown. Duplicate time shows "G. McGusk.) No clue as to his identity.

Time		
Aug.	9 -11 hours	16 – 12
	10 – 11	17 – 13
	11 – 12	18 – 13
	12 – 12	19 – 12
	13 – 11	20 – 12
	14 – 12	21 – 12
	15 – 13	156 hours, $39.00 amount due.

25. O. ELLEFSON.

Buried on Setser Creek. Identified by Mrs. M. Kloven who saw the name of Ellefson in the paper. She wrote to this office concerning the same, and we requested that a photograph be sent. The photograph was positively identified by Ed Basset, one of the men working in the fire crew. Voucher and affidavit have been sent to Mrs. M. Kloven, R. F. D. No. 2, Douglas, South Dakota, and Mrs. L. O. Tollefson, Spring Grove, Minnesota, for execution, these persons being the sisters and only heirs of Mr. Ellefson.

Time

Aug.	9 – 11 hours	16 – 12
	10 – 11	17 – 13
	11 – 12	18 – 13
	12 – 12	19 – 12
	13 – 11	20 – 12
	14 – 12	21 – 12
	15 – 12	155 hours, $38.75 amount due.

26. F. D. SWICK.

Address unknown. Buried on Setser Creek. No clue as to his identity.

Time

Aug. 20 –10 hours
21 – 12
22 hours, $5.50 amount due.

27. W. POLK.

Address unknown. Buried on Setser Creek. No clue as to identity.

Time

Aug. 20 –10 hours
21 – 12
22 hours, $5.50 amount due.

28. WM. CASEY.

Buried on Setser Creek. He was an elderly man. We wrote Mrs. William Casey, who was supposed to be the wife of William Casey, at 519 Second Ave West, Great Falls, Montana. Mrs. Casey thinks that William Casey was her husband, but we have no positive way of identifying him.

Time

Aug. 20 –10 hours
21 – 12
22 hours, $5.50 amount due.

29. GUST JOHANSEN.

Address unknown. Buried on Big Creek. Shipped from Lyons Employment office on August 16th. Shipped to Pocono. No clue as to his identity.

Time

Aug. 16 – 10 19 – 12
17 – 10 20 – 12
18 – 16 60 hours, $ 15.00 amount due.

30. W. FLYNN.

Address unknown. Buried on Big Creek. Signed at Inland Empire Employment Agency, Spokane, Washington, August 15tj. Shipped to Pocono, Aug. 16th. Signed name "Wm. Flynn." No clue as to identity. May have been from Davenport, Iowa. Wrote Chief of Police there, but he writes that he can find no trace of any one by the name of Flynn missing at that place.

Time

Aug. 16 – 10 hours 19 – 12
17 – 10 20 –12
18 – 16 60 hours, $15.00 amount due.

31. SAM HULL.

Address unknown. Buried on Big Creek. Signed name as "S. Hull." Shipped from Inland Employment Agency, Spokane, Aug. 16th. Signed roll Aug. 15th. No clue as to his identity.

Time

Aug.	16 – 10 hours	19 – 12	
	17 – 10	20 – 12	
	18 – 16		60 hours, $15.00 amount due.

32. L. JOHNSON.

Address unknown. Buried on Big Creek. Shipped from Lyon Employment office, Spokane, Washington, Aug. 16, 1910. No clue as to his identity.

Time

Aug.	16 – 10 hours	19 – 12

Died in Bullion tunnel. Buried in Wallace, Idaho. Telegram from Kate D. Savage dated Aug. 5, 1910, from Glove Arizona, was found in his pocket. We corresponded with Mrs. Kate. D. Savage later at Phoenix, Arizona, who states that she was merely a friend of Mr. Elgin. It appears that Mrs. Savage never heard him make any remarks about the location of his people.

Time

Aug. 19 – 13 hours
20 – 12
21 – 15
40 hours, $10.00 amount due.

AVERY FIRE

W. H. Rock's Crew.

---

72. OSCAR WEIGERT.

Residence of his mother, Mrs. Weigert, Missoula, Montana. Effects, consisting of clothes, cartridges, gun, tobacco, cigarette papers, etc., sent to his mother, Mrs. Weigert, at Missoula. Amount due paid to his mother Voucher #1503. Mr. Weigert, apparently thinking that he would be burned to death, committed suicide on the evening of the big fire. The crew Mr. Weigert was with, however, had ample reason to feel that they were in absolute safety, owing to the fact that they were on an area which had received a very hard burn the day before.

The men referred to in this report, although directly supervised by the man in charge of the crew, were all indirectly under my supervision, and up to August 20 and 21, when the great conflagration took place, I was in direct communication with these men either by telephone or messenger every day.

Our object in view in employing these men was to put out the numerous forest fires in the region. Their duties were clear off a fire line about eight feet wide by an advance crew cutting the brush, followed by a crew with mattocks and shovels who would dig off the surface so that the mineral soil would be exposed. This line was always made sufficiently far in advance of the main fire to enable the men in charge to back fire from this fire line so that a space would be burned sufficiently wide between the fire line constructed and the main fire to stop the progress of the advancing fire when it reached this burned space. This system is usually very effective and would have been in this case had it not been for the abnormal conditions.

A camp is always established within a reasonable distance of the fire, so that the men from different parts of the fire line can reach the camp at meal time and in the evening. If conditions are such that it is too far from the camp to where the men are working, provisions are cooked and packed in pails to where the men are working. If water is too far distant canvas bags in connection with pack horses are used to carry water to the men.

There are no claims against the Government at the present time for the death of any of the men who perished on August 20 and 21, 1910, with the exception of the amounts due the men for labor at the time of their death, and in very few cases has this been requested, but we have done everything in our power to learn the location of the friends of these men so that the amount due them might be turned over to the proper parties.

I am herewith enclosing a map of the Coeur d' Alene National Forest showing the location where the men perished, and a few photographs to illustrate the severity of the wind and fire.

Very truly yours,
/s/ W. G. Wiegle
Forest Supervisor.

The United States Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal employment opportunity provider and employer.
